FynnEdge Advisory (OPC) Pvt Ltd

Admin Panel — User Guide

Website: FynnEdge (`fynnedge.com`)
Document: How to Use the Admin Panel
Version: 1.0
Date: 12 September 2026
Audience: FynnEdge administrators, marketing team, SEO team

1. Introduction

1.1 What this admin panel is

The FynnEdge admin panel is the private control room behind the public FynnEdge website. Everything a visitor sees on the website — the loan products, the lenders you are matched with, the homepage banner, the articles, the FAQs, the contact details in the footer — is stored and edited here.

It also collects everything the website produces: enquiries from contact forms, applications started by visitors, credit score checks, and newsletter signups.

1.2 Who should use it

Who	What they normally do here
Administrator	Everything — lenders, eligibility rules, users, website settings
Marketing team member	Website content, banners, articles, testimonials, newsletter campaigns
SEO team member	Page titles, meta descriptions, social share settings, redirects

What you can actually see and click depends on the role your account has been given. If a menu item described in this guide is not in your sidebar, your role does not include it — that is normal, not a fault. See Section 11.

1.3 What you can do here

- **Run the loan business** — maintain the lender panel, the loan products offered, the eligibility rules that decide who qualifies, and the documents each lender needs.
- **Work the leads** — see every enquiry and every application the website produces, and track each one through to a decision.
- **Run the website** — write and publish pages, articles, FAQs, banners, testimonials and marketing sections.
- **Run SEO** — control page titles, descriptions, social previews, structured data, redirects and analytics tags.
- **Run the newsletter** — manage subscribers, build campaigns and send them.
- **Control access** — create user accounts, assign roles, and review a full history of who changed what.

1.4 A note on terminology

Two menu items use similar names. They are different things:

 **Important - Applications** (Catalog) = an application *journey* a visitor started on the website — the step-by-step form, what they answered, and how far they got. - **Loan Applications** (Catalog) = a formal application to a *specific lender*, created after the visitor picked a lender. This is the one that carries documents and a sanction/disbursal status.

2. Logging In

2.1 How to reach the admin panel

Open a web browser and go to your website address followed by `/admin`.

Example: `https://fynnedge.com/admin`

If you are not signed in, you are automatically taken to the sign-in screen.

A screenshot of a sign-in form. At the top is a blue square icon with a white 'f'. Below it is the text 'Sign in'. The form has two input fields: 'Email address*' and 'Password*'. The 'Email address*' field is a simple text box. The 'Password*' field is a text box with a blue 'Forgot password?' link to its right and a blue eye icon to its left. Below the password field is a checkbox labeled 'Remember me'. At the bottom is a blue button with the text 'Sign in'.

Screenshot 1 — Sign-in screen

2.2 The sign-in fields

Field	Required?	What to Enter	Description
Email address	Yes	Your work email	The email your administrator registered for you, e.g. <code>name@fynnedge.com</code>
Password	Yes	Your password	Case-sensitive. Use the eye icon to check what you typed
Remember me	No	Tick or leave blank	Keeps you signed in on this device/browser for longer

2.3 Buttons and links

- **Sign in** — submits the form.
- **Forgot your password?** — opens the password-reset screen. Enter your email address and a reset link is emailed to you. The link is time-limited; request a new one if it expires.

2.4 What happens after a successful sign-in

You land on the **Dashboard**, and the sidebar appears on the left showing only the sections your role allows.

2.5 What happens if the sign-in fails

- **Wrong email or password** — the screen reloads with a message under the fields telling you the credentials do not match. Nothing is revealed about whether the email exists.
- **Too many attempts** — repeated failed attempts are throttled and you are asked to wait before trying again.
- **Account without panel access** — if an administrator has switched off *"Can log into the admin panel"* on your account, sign-in is refused even with the correct password. Ask an administrator to re-enable it.

2.6 Two-factor authentication (optional)

The panel supports authenticator-app two-factor sign-in (Google Authenticator, Authy, 1Password and similar).

Note Two-factor is **available but not forced**. Nobody is required to set it up. If you switch it on for your own account, you will be asked for a 6-digit code after your password from then on.

To turn it on: click your **avatar (top-right)** → **Profile**

*Screenshot 48 — Profile screen, where you set up two-factor authentication, and follow the authenticator-app setup. You are given **recovery codes** — store them somewhere safe; they are the only way back in if you lose your phone.*

2.7 Session behaviour

Your sign-in is tied to the browser you used. Signing out in one browser does not sign you out elsewhere. If you leave the panel idle for a long time you may be returned to the sign-in screen — simply sign in again; nothing is lost except an unsaved form.

3. The Dashboard

Open it any time by clicking **Dashboard** at the very top of the sidebar, or the FynnEdge logo.

Screenshot 2 — Dashboard

The dashboard is deliberately minimal. It contains exactly two cards:

Card	What it shows	What you do with it
Welcome	Your initials, your name, and a Sign out button	Confirms which account you are signed in as. Useful when several people share a machine
Filament	The software version powering the panel, with Documentation and GitHub links	For technical reference only — day-to-day users can ignore it

 **Note** There are **no statistics tiles, charts, date pickers or filters on this Dashboard**. Reporting lives on its own dedicated pages instead: - Loan funnel numbers → **Catalog** → **Funnel Analytics** (Section 6.1) - Newsletter numbers → **Marketing** → **Newsletter** (Section 8.1) - Who changed what → **Access Control** → **Activity** (Section 10.1)

4. Getting Around: The Sidebar

The sidebar lists every section you have access to, organised into groups. Click a group heading to collapse or expand it.

4.1 Complete menu map

Group	Menu item	Purpose	Typically used by
(top)	Dashboard	Landing screen after sign-in	Everyone
Catalog	Funnel Analytics	How many visitors get through each stage of an application	Admin
	Eligibility Tester	Try a made-up applicant against the live rules	Admin
	Loan Applications	Formal applications sent to a chosen lender	Admin
	Credit Score Checks	Credit score checks visitors ran on the website	Admin
	Customers	People who identified themselves on the website	Admin
	Document Requirements	Which documents each lender wants for each product	Admin
	Document Types	The master list of document kinds (PAN card, payslip...)	Admin
	Eligibility Rules	The rule sets that decide who qualifies with each lender	Admin
	Employers	Employer list and how each lender grades them	Admin
	Journeys	The step-by-step forms visitors fill in	Admin
	Applications	Journeys visitors actually started, and their answers	Admin

Group	Menu item	Purpose	Typically used by
	Lender Offers	One lender's terms for one loan product	Admin
	Lenders	The banks and NBFCs on your panel	Admin
	Loan Products	The loan types you offer, and their calculators	Admin
	Testimonials	Customer quotes shown on the website	Admin, Marketing
Filament Shield	Roles	Create roles and tick exactly what each may do	Admin
Content	Media Library	Every uploaded file, and whether it is still used	Admin
	Achievements	The numbers strip on the homepage	Admin, Marketing
	Articles	Blog / resources articles	Admin, Marketing, SEO
	Banners	The sliding homepage banner	Admin, Marketing
	Calculator Pages	Explanatory text under the standalone calculators	Admin, Marketing
	Life at FynnEdge Photos	Company photo gallery	Admin, Marketing
	General FAQs	FAQs not tied to any particular page	Admin, Marketing
	Grievance Redressal Matrix	The complaints-escalation contact table	Admin, Marketing
	How It Works Steps	The numbered "how it works" steps	Admin, Marketing
	Job Openings	Roles listed on the Careers page	Admin, Marketing
	Loan Landing Page Content	Marketing text on landing pages (restricted view)	Marketing
	Loan Landing Page SEO	SEO fields on landing pages (restricted view)	SEO

Group	Menu item	Purpose	Typically used by
	Loan Landing Pages	Full landing-page editor	Admin
	Loan Product Content	Marketing text on loan products (restricted view)	Marketing
	Loan Product SEO	SEO fields on loan products (restricted view)	SEO
	Marketing Sections	Editable call-to-action blocks in fixed slots	Admin, Marketing
	Navigation Links	Footer "Quick Links"	Admin, Marketing
	Page FAQs	FAQs pinned to whole pages	Admin, Marketing
	Pages	Static pages (About, Privacy Policy, Terms...)	Admin, SEO
	Schema Templates	Reusable structured-data blueprints	Admin
	Contact Enquiries	Every enquiry the website's forms produced	Admin
Access Control	Activity	Full history of every admin change	Admin
	Users	Admin accounts and their roles	Admin
Marketing	Newsletter	Newsletter overview and numbers	Admin, Marketing
	Subscribers	Everyone who signed up	Admin, Marketing
	Campaigns	Compose, schedule and send emails	Admin, Marketing
	Templates	Reusable email bodies	Admin, Marketing
	Segments	Saved audience filters	Admin, Marketing
	Newsletter Settings	Sender identity and opt-in rules	Admin
Website Settings	SEO & Tracking	Meta defaults, analytics tags, cookie banner	Admin, SEO

Group	Menu item	Purpose	Typically used by
	Settings	Branding, contact details, colours and fonts	Admin
	Structured Data	How the site describes itself to Google/AI	Admin
	Redirects	Send an old URL to a new one	Admin, SEO

4.2 The top bar

- **Search box (top-centre/right)** — a *global* search. It only covers **Campaigns, Segments, Subscribers, Templates, Redirects, Schema Templates and Roles**. For everything else, use the search box on that section's own list screen.
- **Avatar (far right)** — a menu with **Profile** (change your name, email, password, and set up two-factor) and **Sign out**.

5. How Every List Screen Works

Almost every menu item opens a **list screen** — a table of records. They all behave the same way, so learn this once and it applies everywhere.

Per page10

Screenshot 22 — A typical list screen (Contact Enquiries), showing search, filters, column toggle, row actions and pagination

Element	Where it is	What it does
Search box	Top-right of the table	Types as you go and narrows the table. Only searches the columns marked searchable for that section — each module section below lists them
Active filters bar	Above the table, once a search or filter is on	Shows one chip per active search/filter. Click the ✕ on a chip to drop just that one, or the ✕ at the right-hand end to clear them all
Filter icon (funnel)	Right of the search box	Opens the filter panel. The small number on the icon is how many filters are currently active. Use Reset filters to clear them
Column icon (three bars)	Next to the filter icon	Show or hide optional columns. Some columns start hidden to keep the table readable
Column heading	Table header	Click a heading with a small arrow to sort by it. Click again to reverse

Element	Where it is	What it does
Tick boxes	Far-left column	Select rows for a bulk action. The header tick box selects everything on the page
Row actions	Far-right of each row	Usually Edit or View . Some sections add extra buttons (Publish, Send, Verify...)
New / Create button	Top-right of the page	Only appears in sections where records may be created by hand
Showing X to Y of Z	Bottom-left	How many records match your current search and filters
Per page	Bottom-right	10 by default. Change to 5, 25, 50 or All

5.1 Reordering

A few sections let you drag rows into the order they appear on the website (Achievements, Banners, Testimonials, FAQs, How It Works Steps, Job Openings, Navigation Links, Marketing Sections, Grievance levels, Employer categories, Journey steps, Eligibility rules). Where drag-reorder is available, a drag handle appears at the left of each row. You can also type a number into the **Order** / **Sort order** field on the record itself — lower numbers show first.

5.2 Trash and restore (soft delete)

Some sections keep deleted records in a recoverable "trash" rather than destroying them:

Sections with trash: Lenders, Loan Products, Loan Landing Pages, Articles, Pages, Testimonials, Marketing Sections — and Schema Templates, with the caveat in the warning below.

On those list screens the filter panel contains a **Trashed** filter with three settings:

Setting	Shows
<i>(default)</i>	Only live records
With trashed	Live and deleted records together
Only trashed	Just the deleted records

Once you can see a deleted record you get two extra actions on it:

- **Restore** — brings it back exactly as it was.
- **Force delete** — destroys it permanently. **This cannot be undone.**

 **Warning — Schema Templates are the exception** A deleted schema template *is* kept recoverably, but its list screen has **no Trashed filter**, so once deleted it disappears from the list with no way to find it again from within the panel. Treat deleting a schema template as permanent, and use **Active = Off** to retire one instead. Marketing Sections work the other way round: you can find and restore a deleted one from the list using the Trashed filter and the bulk **Restore** action, but there is no Restore button on the record's own edit screen.

 **Warning** Every other section deletes **immediately and permanently**. There is no trash for Contact Enquiries, Employers, Lender Offers, Document Types, Document Requirements, Redirects, Navigation Links, FAQs, Banners, Achievements, Job Openings, Photos, Grievance levels, Calculator Pages, Users, Newsletter records or Eligibility Rule Sets. You are always asked to confirm first — read the confirmation box before clicking through.

5.3 Editing and saving

1. Click **Edit** on the row you want.
2. Change the fields.
3. Click **Save changes** at the bottom (or the **Save** button at the top on settings screens). **Cancel**, beside it, discards your changes and returns you to the list.
4. A green **Saved** message appears in the top-right corner.

If a required field is empty or a value is invalid, the field turns red with an explanation underneath and nothing is saved until you fix it. Sections that are collapsed will open automatically to show you where the problem is.

 **Note** After you create or edit a record, the panel returns you to the **list screen** rather than staying on the form. This is deliberate, so you can immediately see your record in context.

5.4 The History tab

Many records have a **History** tab under the form showing every change ever made to that record: what action it was (created / updated / deleted), who did it, exactly which fields changed from what to what, and when.

Sections with History: Loan Applications, Lenders, Loan Products, Loan Product Content, Loan Landing Pages, Loan Landing Page Content, Eligibility Rules, Articles, Pages, General FAQs, Page FAQs, Testimonials, Banners, Life at FynnEdge Photos, Marketing Sections, Achievements.

On **content** records (Articles, FAQs, Page FAQs, Testimonials, Banners, Photos, Marketing Sections, Achievements) each "updated" row also carries a **Restore this version** button, which puts every field in that row back to its earlier value and saves. That restore is itself recorded as a new History entry, so nothing is ever lost.

 **Note** Restore is deliberately **not** offered on Loan Products, Lenders, Lender Offers, Loan Applications or Eligibility Rules. Putting a single number back without going through the normal form checks could leave a calculator or an eligibility rule in an inconsistent state.

6. Catalog — Loan Business Modules

6.1 Funnel Analytics

A. PURPOSE

Shows how many visitors reach each stage of the loan application process, so you can see exactly where people drop off.

B. HOW TO OPEN IT

Sidebar → **Catalog** → **Funnel Analytics**

Screenshot 9 — Funnel Analytics

C. FILTERS AT THE TOP

Filter	Options	Effect
Loan product	<i>All products</i> , or any one loan product	Restricts every number on the page to that product
Range	Last 7 days, Last 30 days (<i>default</i>), Last 90 days, All time	Restricts every number to that period

D. THE FUNNEL TABLE

Six fixed stages, in order. Each row shows a **count of visitors** and a **conversion %**.

Stage	Counts visitors who...
Journeys started	Began the application form
Journeys completed	Finished every step of the form
Eligible with a lender	Were found eligible (or conditionally eligible) with at least one lender
Lender selected	Chose a specific lender to proceed with
Documents uploaded	Uploaded at least one document
Application submitted	Completed and submitted the application

 **How to read the percentage** Every percentage is measured against "**Journeys started**" — not against the row above it. So "Documents uploaded 22%" means 22% of everyone who *started* got that far. This lets you see total drop-off without doing any arithmetic.

E. PRODUCTS BREAKDOWN

A table of every loan product with **Started**, **Submitted** and **Conversion %**. Use it to spot a product that pulls lots of traffic but converts poorly.

F. STEP BREAKDOWN

Appears **only when you have selected a single loan product** in the filter (step names are not comparable across different products). It lists each step of that product's live journey and how many visitors completed it — this is where you find the exact question people abandon on.

G. WHAT YOU CANNOT DO HERE

This is a read-only report. There is nothing to create, edit or delete, and no download button.

6.2 Eligibility Tester

A. PURPOSE

Lets you type in a hypothetical applicant and instantly see which lenders would accept them and why — **without creating a real application or contacting anyone**. Use it to sanity-check a rule change before it affects live visitors.

B. HOW TO OPEN IT

C. THE "SAMPLE PROFILE" FORM

Field	Required?	What to Enter	Description
Loan product	Yes	Pick from the list	Only <i>published</i> loan products are listed. Every active lender for this product is tested
Age	Yes	A number, e.g. 32	Applicant's age in years
City	Yes	e.g. Delhi	Matched against any city rules a lender has
Employment type	No	Salaried / Self-employed	

Field	Required?	What to Enter	Description
Employer name	No	e.g. Infosys	Matched against each lender's own employer grading. Leave blank if unknown
Monthly income	Yes	e.g. 85000	Take-home monthly income in ₹
Other monthly income	No	e.g. 10000	Rent, freelance and so on. Defaults to 0
Has existing EMIs	No	Yes / No	Defaults to No
Existing EMI amount	Conditional	e.g. 12000	Appears only when "Has existing EMIs" is set to Yes
Loan amount requested	Yes	e.g. 500000	In ₹
Preferred tenure (months)	Yes	e.g. 48	In months

D. RUNNING THE TEST

Click **Evaluate**. Results appear below the form.

E. READING THE RESULTS

One block per active lender for that product:

- **Lender name**
- **Status** — *Eligible* or *Not eligible*
- **FOIR** — the calculated Fixed Obligation to Income Ratio, as a percentage (see box below)
- **Reasons** — every rule that was checked, whether it passed or failed, its priority, and the customer-facing message attached to it

 **What FOIR means, in plain language** FOIR is the share of the applicant's monthly income that would go to loan repayments. The panel works out the EMI for the requested amount using **that specific lender's own starting interest rate and tenure**, adds any existing EMIs, and divides by total monthly income. Example: existing EMIs ₹12,000 + new EMI ₹13,000 = ₹25,000 against income ₹85,000 → FOIR **29.41%**. Because each lender quotes a different rate, the same applicant will show a different FOIR for each lender. That is correct, not a bug.

 **Note** If a lender has **no published (Active) rule set**, that lender is reported as *Not eligible* with no reasons listed. That means "no rules configured", not "the applicant was rejected".

6.3 Loan Applications

A. PURPOSE

A formal application to one specific lender. It is created automatically by the website when a visitor picks a lender from their eligibility results. It carries the customer's uploaded documents and tracks the application through to disbursal.

B. HOW TO OPEN IT

Sidebar → **Catalog** → **Loan Applications**

The screenshot displays the 'Loan Applications' list page. The sidebar on the left includes navigation items: Dashboard, Catalog, Funnel Analytics, Eligibility Tester, **Loan Applications**, Credit Score Checks, Customers, Document Requirements, Document Types, Eligibility Rules, Employers, Journeys, Applications, Lender Offers, Lenders, Loan Products, Testimonials, Filament Shield, and Roles. The main content area shows the 'Loan Applications' list with a search bar and a table of 7 results. The table columns are Customer, Lender, Product, Status, Submitted at, and Created at. The status column shows 'Lender selected' or 'Submitted'. The bottom of the table indicates 'Showing 1 to 7 of 7 results' and a 'Per page' dropdown set to 10.

Screenshot 3 — Loan Applications list

C. THE LIST SCREEN

Column	What it shows
Customer	Customer's full name, with their email address underneath
Lender	The lender the application went to
Product	The loan product applied for
Status	Colour-coded badge — grey (early), amber (in progress), green (approved/disbursed), red (ended without a loan)
Submitted at	When the customer submitted it
Created at	When the application record was first created

- **Search:** Customer name, Lender name, Product name
- **Filter:** Status
- **Sort:** Submitted at, Created at. Newest first by default
- **Row action:** Edit
- **Bulk actions:** None
- **Create: Not available.** Applications only ever come from a real customer on the website

D. CREATE/ADD NEW

Not applicable — there is no Create button for this section, by design.

Document	File	Status	Rejection reason	Uploaded at
No application documents				

Status

Status*

Submitted

Draft through Submitted are set by the website journey itself. Later stages happen in the lender's own processing and, until a FYNN-ON sync exists, can be recorded here manually as a stopgap.

Screenshot 4 — Loan Application detail

Field	Meaning
Customer	The applicant (shown by email)
Lender product	Which lender's offer this is, shown as <i>Lender — Product</i>
Submitted at	When it was submitted

Section: Status — the only editable field:

Field	Required?	What to Enter	Description
Status	Yes	Pick from the list	Where this application currently stands. See the workflow below

 **Note printed on the form** "Draft through Submitted are set by the website journey itself. Later stages happen in the lender's own processing and, until a FYNN-ON sync exists, can be recorded here manually as a stopgap." In other words: the early statuses look after themselves; the later ones are yours to keep up to date by hand.

F. DOCUMENTS TAB

Under the form is a **Documents** tab listing every file the customer uploaded.

Column	What it shows
Document	Which document type it satisfies (PAN card, payslip...)
File	The original filename the customer uploaded
Status	Uploaded (amber), Verified (green) or Rejected (red)
Rejection reason	Why it was rejected — optional column, switch it on with the column icon
Uploaded at	When the customer uploaded it

Two actions per document:

- **Verify** — marks it Verified, clears any rejection reason and stamps the verification time. Hidden once already verified.
- **Reject** — opens a small box asking for a **Reason** (required). The document becomes Rejected, the reason is stored and the verification time is cleared. Hidden once already rejected.

 **Warning** You cannot upload or delete documents from the admin panel. Documents come only from the customer. A rejected document must be re-uploaded by the customer.

G. HISTORY TAB

Full change history of the application. Read-only — no restore.

H. DELETE

There is **no delete action** on loan applications, in the list or on the edit screen. They are permanent records.

I. STATUS WORKFLOW

The website sets these automatically as the customer progresses:

Draft

↓ (customer picks a lender from their eligibility results)

Lender selected

↓ (system lists what this lender requires)

Documents pending

↓ (customer uploads everything required)

Documents submitted

↓ (customer presses Submit – only possible once every required document, in the required

Submitted

From **Submitted** onwards, you record progress by hand as the lender reports it:

Submitted

↓

Under review → lender is assessing it

↓

Sanctioned → lender has approved it

↓

Agreement pending → waiting on the customer to sign

↓

Disbursal processing → lender is releasing funds

↓

Disbursed → money has reached the customer. This is the successful end state

Three end states can be set at any point:

Status	Use it when
Rejected	The lender declined the application
Withdrawn	The customer chose not to continue
Cancelled	The application was cancelled for any other reason

Who can change status: anyone whose role includes *Update* permission on Loan Applications. There is no restriction on which status you may move to — the dropdown always offers all thirteen — so follow the sequence above as an operating discipline. Every change is written to the History tab with your name against it.

6.4 Credit Score Checks

A. PURPOSE

A read-only record of every free credit-score check a visitor ran on the public website. Useful for support ("did my check go through?") and for spotting failures with the bureau.

B. HOW TO OPEN IT

Sidebar → Catalog → Credit Score Checks

Screenshot 8 — Credit Score Checks

C. THE LIST SCREEN

Column	What it shows
Bureau	CIBIL, Experian, Equifax or CRIF
Name	The applicant's name, with their mobile number underneath
PAN	The PAN quoted for the check

Column	What it shows
Score	The score returned, if the check completed
Status	Completed (green), Pending (amber), Failed (red), Not requested (grey)
Created at	When the check was run

- **Search:** Name, PAN
- **Filters:** Bureau, Status
- **Sort:** Created at (newest first by default)
- **Row action:** View
- **Create / Edit / Delete:** None. This section is entirely read-only

D. THE VIEW SCREEN

Section: Check — Bureau, Status, Score, Provider, IP address, Completed at.

Section: Applicant — Full name, Mobile number, PAN, Date of birth, Mobile verified at, Consent given at.

 **Warning — handle with care** This screen contains personal and financial data (PAN, date of birth, credit score). Only open it when you have a genuine business reason, and never share what you see outside the organisation.

6.5 Customers

A. PURPOSE

One record per person who identified themselves on the website. It ties together every application journey that person started.

Screenshot 7 — Customers list

C. THE LIST SCREEN

Column	What it shows
Full name	The customer's name
Email address	Their email
Phone	Their phone number
Applications	How many application journeys this person has started
First seen	When they first appeared on the website

- **Search:** Full name, Email address, Phone
- **Sort:** First seen (newest first by default)
- **Filters:** None
- **Row action:** Edit
- **Create: Not available** — customers only ever come from the website

D. THE EDIT SCREEN

Field	Required?	What to Enter	Description
Full name	No	e.g. <code>Rahul Kumar</code>	Correct a typo or fill in a missing name
Email address	Yes	e.g. <code>rahul@example.com</code>	Must be a valid email. Cannot be left blank
Phone	No	e.g. <code>9876543210</code>	Contact number

Click **Save changes**.

E. APPLICATIONS TAB

Below the form, a read-only list of every journey this customer started: Product, Current step, Status (Completed / In progress / Abandoned), Created at, Completed at. You cannot add or edit rows here — open **Catalog** → **Applications** to inspect one in full.

F. DELETE

A **Delete** button sits at the top of the Edit screen. You are asked to confirm.

 **Warning** Deleting a customer is **permanent** — there is no trash for customers. Their linked journeys, eligibility results and applications lose their owner. Only delete on a genuine data-removal request, and record why.

6.6 Document Requirements

A. PURPOSE

Defines exactly which documents a given lender wants for a given loan product, and how many of each. This is what the website shows the customer as their upload checklist — and what decides whether they are allowed to submit.

B. HOW TO OPEN IT

Screenshot 50 — Employer edit form with per-lender ratings

Field	Required?	What to Enter	Description	Example
Lender product	Yes	Search and pick	Shown as <i>Lender — Product</i> . This is the specific lender offer the requirement belongs to	HDFC Bank — Personal Loan
Document type	Yes	Search and pick	Which kind of document. Managed in Document Types	Salary Slip
Required	No	On / Off (default On)	On = the customer cannot submit without it	On

Field	Required?	What to Enter	Description	Example
Order	No	Number (default 0)	Lower numbers appear first in the checklist	3
Minimum uploads required	No	Number, 1 or more (default 1)	How many files satisfy it. Only applies while "Required" is on	3 for three months of payslips
Notes	No	Short text	Extra instruction shown alongside	Last 3 months, PDF preferred

1. Click **Create**.

E. EDIT / DELETE

Edit changes any field above. **Delete** is on the Edit screen and in the bulk menu; it is **permanent**.

 **Warning** Changing requirements affects **in-flight applications**. Raising "Minimum uploads" from 1 to 3 means customers who had already finished uploading can no longer submit until they add two more files. Add new requirements early in the day and tell your operations team.

6.7 Document Types

A. PURPOSE

The master list of *kinds* of document (PAN card, Aadhaar, payslip, bank statement...). Document Requirements point at these, so each type is defined once and reused across every lender.

Per page 10

Screenshot 20 — Document Types

C. THE LIST SCREEN

Column	What it shows
Key	The stable internal code
Label	What the customer sees
Order	Display position
Multiple	Tick if the customer may upload several files
Custom label	Tick if the customer is asked to name each upload
Used by	How many lender requirements reference this type

- **Search:** Key, Label
- **Sort:** Order (default), Key
- **Row action:** Edit

- **Bulk action:** Delete selected

D. CREATE / ADD NEW

Field	Required?	What to Enter	Description	Example
Key	Yes	Lower-case, underscores, no spaces. Must be unique	The stable identifier requirements refer to. Do not change it after it is in use	pan_card
Label	Yes	Plain English	What the customer sees on the upload screen	PAN Card
Description	No	A sentence or two	Extra guidance for the customer	A clear photo or scan of your PAN card
Order	No	Number (default 0)	Lower shows first	1
Allow multiple uploads	No	On / Off (default Off)	Gives the customer an "Add another document" button	On, for Other
Ask customer to name each upload	No	On / Off (default Off)	Adds a text box per file so the customer can label it	On, for Other

E. DELETE

 **Warning** Deleting is **permanent**. Check the **Used by** column first — deleting a type still referenced by lender requirements breaks those checklists. Set the count to zero before deleting.

6.8 Eligibility Rules

A. PURPOSE

This is the heart of the matching engine. For each lender offer you build a **rule set**: a numbered version containing the rules that decide whether an applicant qualifies with that lender. Rule sets are versioned, so you can prepare

next month's criteria as a draft while today's stay live.

C. THE LIST SCREEN

Column	What it shows
Lender	The lender
Product	The loan product
Version	The version number of this rule set
Rules	How many rules it contains
Status	Active (green), Draft (amber), Archived (grey)

Column	What it shows
Effective from	Date it takes effect
Effective until	Date it stops

- **Search:** Lender, Product
- **Filter:** Status
- **Sort:** Newest first by default
- **Row actions:** **Publish** (drafts only) and **Edit**
- **Bulk action:** Delete selected

D. CREATE A RULE SET

1. Click **New eligibility rule set**.

Field	Required?	What to Enter	Description
Lender product	Yes	Search and pick	Shown as <i>Lender — Product</i>
Version	Yes	Number (default 1)	Increase it for each new revision so you can tell versions apart
Status	Yes	Draft (<i>default</i>) / Active / Archived	Always leave new sets as Draft and publish them with the Publish button
Effective from	No	Date	When these criteria start applying. Filled in automatically on publish if left blank
Effective until	No	Date	When they stop
Notes	No	Free text	<i>Why</i> this version exists — e.g. FOIR relaxed from 50% to 55% per bank circular dated 01-09-2026

1. Click **Create**. You are returned to the list. Now click **Edit** on your new set to add its rules.

E. ADDING RULES

On the Edit screen, a **Rules** tab appears underneath. Click **New rule**.

Rules History

Rules

New eligibility rule

Order	Label	Priority	Logic	Conditions
1	Age between 21 and 60	Mandatory — fails the lender if not met	All conditions must pass (AND)	1
2	Minimum monthly income	Mandatory — fails the lender if not met	All conditions must pass (AND)	1
3	Minimum employment vintage	Mandatory — fails the lender if not met	All conditions must pass (AND)	1
4	FOIR within limit	Mandatory — fails the lender if not met	All conditions must pass (AND)	1
5	Preferred employer category	Preferred — affects ranking only	All conditions must pass (AND)	1
6	Has existing obligations	Warning — surfaces a caveat, never fails	All conditions must pass (AND)	1

Showing 1 to 6 of 6 results

Per page 10

Screenshot 12 — An eligibility rule set and its Rules tab

Field	Required?	What to Enter	Description
Label	Yes	Short name	What this check is called internally, e.g. <code>Minimum age</code>
Priority	Yes	Default Mandatory	See the table below
Combine conditions with	Yes	Default All conditions must pass (AND)	AND = every condition must be true. OR = any one is enough
Customer-facing message	No	A sentence	Shown to the applicant explaining this specific check, whether it passes or fails
Order	No	Number (default <code>0</code>)	Position in the list

Priority — what each one does:

Priority	Effect
Mandatory	If it fails, the applicant is not eligible with this lender
Preferred	Affects ranking only — never blocks eligibility
Warning	Surfaces a caveat to the applicant — never blocks eligibility

Conditions. Every rule needs at least one condition. Click **Add condition**:

Field	Required?	What to Enter	Description
Attribute	Yes	The thing being tested	age , total_monthly_income , city , employer_category , foir , credit_score — or the key of any field in that product's journey form
Operator	Yes	Pick one	See the operator table below
Value	Yes	The value to compare against	The hint under the box changes with the operator: a single value for most, comma-separated for <i>Is one of</i> , <i>Is not one of</i> and <i>Between</i>
Order	No	Number	Position within the rule

Operators available: Equals (=), Not equals (!=), Greater than (>), Greater than or equal (>=), Less than (<), Less than or equal (<=), Is one of (IN), Is not one of (NOT IN), Between (inclusive), Contains text, Starts with text.

 **Worked example** Rule: "**Income and location**" · Priority **Mandatory** · Combine with **AND** Condition 1 — Attribute total_monthly_income , Operator Greater than or equal (>=) , Value 40000 Condition 2 — Attribute city , Operator Is one of (IN) , Value Delhi, Mumbai, Bengaluru Result: only applicants earning ₹40,000+ a month **and** living in one of those three cities pass. Anyone else is not eligible with this lender.

F. PUBLISHING A RULE SET

Click **Publish** — on the list row, or at the top of the Edit screen. It is only offered while the set is a **Draft**. You are asked to confirm:

"This makes it the active rule set for this lender product and archives whichever version was active before."

What happens on a successful publish:

- 1. Whichever version was **Active** for this lender offer becomes **Archived**.
- 2. This set becomes **Active**.
- 3. If **Effective from** was blank, today's date is filled in.
- 4. A green *"Rule set published"* message appears.

The panel refuses to publish and shows a red "Could not publish" message if:

Reason shown	How to fix it
<i>"This rule set has no rules yet — add at least one before publishing."</i>	Add a rule
<i>"Rule "X" has no conditions — remove it or add at least one."</i>	Give that rule a condition, or delete the rule
<i>"At least one mandatory rule is required, otherwise every applicant would be eligible by default."</i>	Set at least one rule's priority to Mandatory
<i>"The effective-from date must be before the effective-until date."</i>	Correct the dates

 **Warning** Publishing takes effect **immediately** for every visitor. Always test the new criteria in the **Eligibility Tester** (Section 6.2) before you publish.

G. STATUS WORKFLOW

Status	Meaning	Who can change it
Draft	Being built. Not used by any visitor	Anyone with Update on Eligibility Rules
Active	Live. Used to evaluate every applicant for this lender offer. Only one per lender offer at a time	Set only by the Publish button
Archived	Superseded. Kept for reference	Set automatically when a newer version is published

H. DELETE

Delete is on the Edit screen and in the bulk menu, and is **permanent**. Prefer archiving over deleting so your audit trail stays intact.

6.9 Employers

A. PURPOSE

A list of employers, and how each lender grades them. Many lenders offer better terms to employees of large or listed companies, so they group employers into categories (A, B, C...). This section records which category each lender puts each employer in — and eligibility rules can then test `employer_category`.

B. HOW TO OPEN IT

Q Search

☐ Name	Lenders rated	Updated at	
☐ DEMO Employer Pvt Ltd	1	Aug 29, 2026 09:46:06	Edit
☐ DEMO Home Finance Employer Pvt Ltd	1	Aug 29, 2026 09:46:06	Edit

Showing 1 to 2 of 2 results

Per page 10

Screenshot 19 — Employers

C. THE LIST SCREEN

Column	What it shows
Name	The employer's name
Lenders rated	How many lenders have graded this employer
Updated at	When it last changed

- **Search:** Name
- **Sort:** Name (default), Updated at
- **Filters:** None
- **Row action:** Edit
- **Bulk action:** Delete selected
- **Header buttons:** **New employer** and **Bulk upload employers**

D. CREATE / ADD NEW

Field	Required?	What to Enter	Description
Name	Yes	Company name. Must be unique	e.g. <code>Tata Consultancy Services</code>
Notes	No	Free text	Anything useful internally
Category by lender	No	Repeating rows	For each lender that grades this employer, add a row

For each **Category by lender** row:

Field	Required?	What to Enter
Lender	Yes	Search and pick the lender
Category	Yes	Pick one of that lender's own categories

 **Note** The **Category** list is filtered by the lender you picked in that same row. If it is empty, that lender has no categories set up yet — add them first under **Lenders** → **(the lender)** → **Employer categories**.

E. DELETE

Permanent, with a confirmation. Removing an employer removes its lender ratings too, and any rule testing `employer_category` will simply find nothing for that employer.

F. BULK UPLOAD

See Section 14.2.

6.10 Journeys

A. PURPOSE

Defines the step-by-step form a visitor fills in on the website for a given loan product — the steps, the questions on each step, and when a question should appear. Like eligibility rules, journeys are versioned.

B. HOW TO OPEN IT

Sidebar → **Catalog** → **Journeys**

Screenshot 44 — Journeys

C. THE LIST SCREEN

Column	What it shows
Loan product	The product this journey belongs to
Version	Version number
Steps	How many steps it has
Status	Active (green), Draft (amber), Archived (grey)
Updated at	Optional column

- **Search:** Loan product
- **Filter:** Status
- **Row action:** Edit
- **Bulk action:** Delete selected

D. CREATE A JOURNEY

Field	Required?	What to Enter	Description
Loan product	Yes	Search and pick	Which product this form is for
Version	Yes	Number (default 1)	Increase for each revision
Status	Yes	Draft (<i>default</i>) / Active / Archived	Only one journey per product should be Active

 **Warning** Unlike Eligibility Rules, journeys have **no Publish button**. You change Status by hand on the Edit screen. Before setting a new version to **Active**, set the old one to **Archived** yourself — otherwise two versions are active at once and the website picks the highest version number, which may not be the one you intended.

E. ADDING STEPS

Open the journey, then the **Steps** tab → **New step**.

Showing 1 to 6 of 6 results

Per page
10

Screenshot 51 — Journey edit screen with its Steps tab

Field	Required?	What to Enter	Description
Key	Yes	Lower-case with hyphens	Stable identifier, e.g. <code>employment-details</code>
Title	Yes	Plain English	The heading the customer sees
Order	Yes	Number (default <code>0</code>)	Step sequence. Rows can also be dragged
Description	No	A sentence	Shown to the customer under the step title

F. ADDING FIELDS (QUESTIONS) TO A STEP

Inside a step, use **Add field**. Each field has:

Field	Required?	What to Enter	Description
Key	Yes	Lower-case with underscores	The answer key, e.g. <code>monthly_income</code> . Eligibility rules test these keys , so keep them consistent
Label	Yes	Plain English	The question the customer reads

Field	Required?	What to Enter	Description
Type	Yes	Pick one	See the type list below
Help text	No	A sentence	Small print under the question
Order	No	Number	Position on the step
Validation rules	No	Tags	Laravel rule names, one per tag, e.g. <code>required</code> , <code>numeric</code>

Field types: Text · Number · Email · Phone · Date · Select (dropdown) · Searchable dropdown (with "Other") · Radio buttons · Checkbox · Long text.

Options — a repeating Value/Label list — **appears only when Type is Select, Searchable dropdown or Radio buttons.**

"Only show this field when..." — makes a question conditional on an earlier answer:

Field	What to Enter
Field key	The key of the earlier question, e.g. <code>has_existing_emis</code>
Operator	<i>equals</i> (default), <i>not equals</i> , or <i>is one of</i>
Value	The answer that reveals this field, e.g. <code>yes</code>

Leave all three blank and the question always shows.

 **Example** Field `existing_emi_amount` with *Only show this field when* → Field key `has_existing_emis` , Operator `equals` , Value `yes` . The customer is only asked how much their EMIs are if they said they have some.

G. DELETE

Permanent. Deleting a journey does not delete the applications visitors already made with it.

6.11 Applications (Journey Sessions)

A. PURPOSE

Every application journey a visitor actually started — how far they got, and every answer they gave. This is where you look to understand an individual lead in detail.

B. HOW TO OPEN IT

Sidebar → Catalog → Applications

Screenshot 5 — Applications (journey sessions)

C. THE LIST SCREEN

Column	What it shows
Product	The loan product
Customer	Name, with email underneath
Current step	Which step they are on (or stopped at)

Column	What it shows
Status	Completed (green), In progress (amber), Abandoned (grey)
Source	The marketing source (<code>utm_source</code>) — optional column
Created at	When they started
Completed at	When they finished

- **Search:** Product, Customer
- **Filter:** Status
- **Sort:** Created at, Completed at (newest first by default)
- **Row action:** View
- **Create / Edit / Delete:** None. This section is entirely read-only

D. THE VIEW SCREEN

Section: Application — Loan product, Customer, Status, Current step, Completed at. All read-only.

The screenshot shows a web application interface. On the left is a sidebar with a 'Catalog' section containing various items like 'Funnel Analytics', 'Eligibility Tester', 'Loan Applications', etc. The 'Applications' item is highlighted. The main content area is titled 'View Application' and contains a form with the following fields:

- Application** (header)
- Loan product**: Gold Loan (dropdown)
- Customer**: (empty dropdown)
- Status**: In progress (dropdown)
- Current step**: Basic details (dropdown)
- Completed at**: mm/dd/yyyy, --:--:-- -- (text input)
- Attribution**: (dropdown menu)
- Responses** (section header)
- Field** / **Value** (table headers)
- No journey responses** (message in a box)

Screenshot 6 — Application (journey session) detail

Section: Credit bureau consent — appears only if the visitor gave bureau consent during this journey.

Shows Purpose, Terms version, IP address and Consented at. This is your consent audit record.

Section: Attribution — collapsed by default; click to open. Shows utm_source, utm_medium, utm_campaign, Referrer and Landing page — where this lead came from.

Responses tab — every question key and the answer the visitor gave. Multiple-choice answers are shown comma-separated.

6.12 Lender Offers

A. PURPOSE

One lender's specific terms for one loan product: amounts, tenure, interest rate, processing fee, and who typically qualifies. Everything the public comparison tables show comes from here.

Screenshot 15 — Lender Offers list

C. THE LIST SCREEN

Column	What it shows
Lender	The lender
Product	The loan product
Min amount / Max amount	The lending range, in ₹
Rate from / Rate to	The interest range, as a %
Fee	The processing fee, formatted for display — optional column
Min score	Minimum credit score — optional column
Status	Active (green) or Inactive (grey)
Updated at	Optional column

- **Search:** Lender, Product

- **Filters:** Product, Status
- **Sort:** Lender, Product, Min amount, Max amount
- **Row actions:** Edit, Delete
- **Bulk action:** Delete selected
- **Header buttons:** New lender product and Import

Note Status = Inactive takes this offer out of eligibility matching and off the public comparison tables immediately, but keeps the record and its rules. This is the safe way to pause a lender — much safer than deleting.

Informational only — shown to visitors as "who qualifies" bullet points. Does not affect the eligibility rule engine used during the application journey.

Create Create & create another Cancel

Screenshot 16 — Creating a Lender Offer

Top of the form:

Field	Required?	What to Enter	Description
Lender	Yes	Search and pick	Which bank/NBFC
Loan product	Yes	Search and pick	Which product. A lender may only have one offer per product — you get <i>"This lender already has an offer for this loan product."</i> if it exists
Status	Yes	Active (default) / Inactive	Whether this offer is live

Offer terms:

Field	Required?	What to Enter	Description
Min amount	No	Number in ₹	Smallest loan this lender will give
Max amount	No	Number in ₹	Largest loan
Min tenure months	No	Number	Shortest term
Max tenure months	No	Number	Longest term
Initial tenure (hybrid products only)	No	Number of months	Only meaningful for a hybrid/flexi loan. The interest-only opening stage for this lender. Blank = use the product's default. Ignored on a standard EMI product
Interest rate from	No	Number, %	Lowest rate offered
Interest rate to	No	Number, %	Highest rate offered

Processing fee (a bordered group):

Field	Required?	What to Enter	Description
Flat fee from (₹)	No	Number	Fill in either the flat pair or the percentage pair — not both
Flat fee up to (₹)	No	Number	
Percentage from (%)	No	Number	
Percentage up to (%)	No	Number	
GST is extra (not included above)	No	On / Off (default On)	Whether the quoted fee excludes GST
Note	No	Short text	For slab detail, e.g. 1% up to ₹5L, 2% above ₹5L

 **Warning** If you fill in both a flat fee **and** a percentage, **the flat fee wins** on the public site. Use one or the other.

Who typically qualifies (a bordered group):

Field	Required?	What to Enter	Description
Min age / Max age	No	Number, years	
Min credit score	No	Number	
Min monthly income	No	Number in ₹ per month	
Min employment vintage months	No	Number	Months in the current job
Employment types	No	Tick Salaried and/or Self-employed	

 **Important** Everything in **"Who typically qualifies"** is **informational only** — it is displayed to visitors as "who qualifies" bullet points. It does **not** affect the eligibility engine. Real matching is done by the rules in **Eligibility Rules** (Section 6.8). If you tighten a number here and nothing changes in matching, that is why.

E. EDIT / DELETE

Edit changes anything above. **Delete** is on the row and in the bulk menu.

 **Warning** Deleting a lender offer is **permanent** — **there is no trash for lender offers**. Its eligibility rule sets and document requirements lose their parent. To pause an offer, set **Status = Inactive** instead.

F. IMPORT

See Section 14.1.

6.13 Lenders

A. PURPOSE

The banks and NBFCs on your panel. A lender record holds the brand information plus that lender's own employer-grading scale.

B. HOW TO OPEN IT

Sidebar → **Catalog** → **Lenders**

Screenshot 13 — Lenders list

C. THE LIST SCREEN

Column	What it shows
(logo)	The lender's logo, shown as a circle
Name	The lender's name
Type	Bank or NBFC / HFC — optional column
Products	How many loan products this lender offers
Status	Active (green) or Inactive (grey)
Updated at	Optional column

- **Search:** Name
- **Filters:** Status, Type, **Trashed**
- **Sort:** Name (default)

- **Row action:** Edit
- **Bulk actions:** Delete selected, Force-delete selected, Restore selected

D. CREATE / ADD NEW

Field	Required?	What to Enter	Description	Example
Name	Yes	The lender's name	Typing here auto-fills the Slug below	HDFC Bank
Slug	Yes	Lower-case with hyphens. Must be unique	Used in web addresses. Auto-filled from the name — only change it if you must	hdfc-bank
Logo	No	PNG, SVG or WebP, up to 2 MB	Shown on comparison tables	
Description	No	A short paragraph	Internal/marketing description	
Status	Yes	Active (<i>default</i>) / Inactive	Inactive removes the lender from public display	
Type	No	Bank / NBFC / HFC		Bank
Serviceable locations	No	Type a city and press Enter for each	Cities or regions this lender covers. Leave empty if nationwide	Delhi , Mumbai

E. EMPLOYER CATEGORIES TAB

On the Edit screen, an **Employer categories** tab holds this lender

Employer categories

New employer category

↑↓

☐	Order	Key	Label	Description	
☐	1	A	Category A — Government / PSU / Listed MNC		Edit Delete
☐	2	B	Category B — Private Limited (rated)		Edit Delete
☐	3	C	Category C — Other / SME / Unrated		Edit Delete

Showing 1 to 3 of 3 results

Per page 10

Screenshot 14 — Lender edit screen with the Employer categories tab's own grading scale. Each lender defines its own — Category "A" for one bank means nothing to another.

Field	Required?	What to Enter	Description
Key	Yes	A short code	Used in eligibility rules, e.g. <code>A</code>
Label	Yes	Plain English	e.g. <code>Category A – MNC / Listed</code>
Order	No	Number (default <code>0</code>)	Display position — rows can also be dragged
Description	No	Free text	

Note Set these up **before** grading employers or bulk-uploading employer ratings. The employer bulk upload rejects any row naming a category this lender does not have.

F. HISTORY TAB

Full change history. Read-only — no restore.

G. DELETE / RESTORE

Delete moves the lender to the trash. Use the **Trashed** filter to find it again, then **Restore** it, or **Force delete** to destroy it permanently.

Warning Deleting a lender affects every lender offer, eligibility rule set and document requirement underneath it. To take a lender off the site temporarily, set **Status = Inactive** instead.

6.14 Loan Products

A. PURPOSE

The loan types FynnEdge offers — Personal Loan, Home Loan, Car Loan and so on. A loan product record holds its public page content, its EMI calculator configuration and its SEO settings.

B. HOW TO OPEN IT

Sidebar → **Catalog** → **Loan Products**

Screenshot 17 — Loan Products list

C. THE LIST SCREEN

Column	What it shows
Name	The product name
Category	Its loan category badge
Lenders	How many lenders offer it
Status	Published (green) or Draft (amber)
Published at	Optional column
Updated at	Optional column

- **Search:** Name
- **Filters:** Category, Status, **Trashed**
- **Sort:** Name (default)

- **Row action:** Edit
- **Bulk actions:** Delete, Force delete, Restore

D. CREATE / ADD NEW — SECTION BY SECTION

Optional. The product stops appearing publicly after this time.

Showing 1 to 3 of 3 results

Per page

10

Screenshot 18 — Loan Product edit form

Section 1: Overview

Field	Required?	What to Enter	Description
Name	Yes	e.g. <code>Personal Loan</code>	Auto-fills the Slug below
Slug	Yes	Unique, lower-case with hyphens	The web address part, e.g. <code>/loans/personal-loan</code>
Category	Yes	Pick one	Personal Loan, Home Loan, Car Loan, Loan Against Property, Business Loan, Credit Card, Gold Loan, Two Wheeler Loan, Term Loan, Tractor Loan, Mudra Loan, Flexi Hybrid Term Loan
Calculator key	No	EMI / Personal Loan / Home Loan / Business Loan / Loan Against Property	Which calculator style this product uses
Summary	No	Up to 160 characters	Shown on product cards; also the fallback meta description
Status	Yes	Draft (<i>default</i>) / Published	
Published at	Conditional	Date and time	Appears only when Status is Published. Set a future time to schedule it

Field	Required?	What to Enter	Description
Expires at	No	Date and time	The product stops appearing publicly after this time

Section 2: Marketing — *presentation only; none of these affect eligibility, interest or the calculator.*

Field	Required?	What to Enter	Description
Marketing headline	No	Up to 255 characters	A tagline above the product name, e.g. India's fastest personal loan approval
Benefits	No	Type and press Enter for each	Customer-facing benefits, e.g. Same-day disbursement
Primary button label	No	Up to 255 characters	Overrides the default "Check Your Eligibility" wording. The button still starts the real eligibility journey — only the wording changes
Product image	No	JPG/PNG/WebP up to 5 MB	
Image alt text	No	A short description	For screen readers and search engines

Section 3: Content

Field	Required?	What to Enter	Description
Body	No	Rich text	The main page copy — headings, bold, lists, links
Features	No	Tags	Short benefit bullets, e.g. No collateral required
Eligibility points	No	Tags	A plain-language eligibility summary. This is text only — it is not the rule engine
Documents required	No	Tags	A plain-language document list
Process steps	No	Tags	The steps shown to a customer

Section 4: EMI calculator

⚠ Important These fields **drive the public EMI calculator directly** — its sliders, its limits and its starting values. **Leave any of them blank and the calculator will not appear for this product.**

Field	Required?	What to Enter	Description
Minimum amount	No*	₹	Lower end of the amount slider
Maximum amount	No*	₹	Upper end of the amount slider
Default amount	No*	₹	Where the amount slider starts
Minimum tenure	No*	Months	
Maximum tenure	No*	Months	
Default tenure	No*	Months	
Default initial tenure	No	Months	Hybrid/flexi products only — the interest-only opening stage before it converts to principal + interest. A lender can override it on its own offer. Ignored for a standard EMI product
Minimum rate	No*	% p.a.	Lower end of the rate slider
Maximum rate	No*	% p.a.	Upper end. Set it above your quoted ceiling for a 24%+ -style range so the slider can actually reach higher
Default rate	No*	% p.a.	Where the rate slider starts
Displayed rate range	No	Free text	The indicative range shown to visitors, e.g. 10.49% – 24%+ . Purely text — it does not move the slider
EMI calculation explanation	No	Rich text	Shown on this loan type's standalone EMI calculator page, separate from the Content body

* Not enforced by the form, but the calculator is hidden until the set is complete.

Section 5: SEO — collapsed by default. See Section 7.1.

E. HEADER BUTTONS ON THE EDIT SCREEN

- **Preview** — opens the live public page in a new tab using a temporary signed link valid for 30 minutes, so you can check a **draft** exactly as it will look without publishing it.
- **Delete** — moves it to the trash.
- **Force delete / Restore** — shown when you are viewing a trashed record.

F. LENDERS OFFERING THIS PRODUCT TAB

Add or edit the lender offers for this product without leaving the page — the same fields as Section 6.12, minus the product picker.

G. HISTORY TAB

Read-only. No "Restore this version" here — see the note in Section 5.4.

H. PUBLISHING WORKFLOW

Status	What visitors see
Draft	Nothing. The product is invisible on the public site
Published, Published at blank or in the past, Expires at blank or in the future	The product is live
Published, Published at in the future	Not yet live — it appears automatically at that time
Published, Expires at in the past	No longer live — it disappeared automatically at that time

6.15 Testimonials

A. PURPOSE

Customer quotes displayed across the website.

B. HOW TO OPEN IT

Sidebar → **Catalog** → **Testimonials**

Screenshot 30 — Testimonials

C. THE LIST SCREEN

Columns: avatar, Customer name, Role / location, Category (shows **General** when blank), Rating, Status, Order, Updated at.

- **Search:** Customer name
- **Filters:** Category, Status, **Trashed**
- **Sort / reorder:** Drag rows, or use Sort order
- **Row action:** Edit
- **Bulk actions:** Delete, Force delete, Restore

D. CREATE / ADD NEW

Field	Required?	What to Enter	Description
Customer name	Yes	e.g. Priya Sharma	

Field	Required?	What to Enter	Description
Role / location	No	e.g. Personal Loan customer, Bengaluru	Shown under the name
Loan category	No	Pick one, or leave blank	Blank = shown on every loan page. Set it to also show on that category's pages
Rating	No	1 to 5	
Quote	Yes	The testimonial text	
Avatar	No	JPG/PNG/WebP up to 2 MB	
Avatar alt text	No	A short description	
Sort order	No	Number (default 0)	Lower shows first
Status	Yes	Draft (<i>default</i>) / Published	
Published at	Conditional	Date and time	Appears only when Status is Published
Expires at	No	Date and time	Stops showing after this time

Screenshot 67 — Testimonial form

Warning — compliance Only publish testimonials you actually received and have permission to use. They are public claims about your service.

7. Content — Website Content Modules

7.1 The shared SEO section

Four sections — **Loan Products**, **Loan Landing Pages**, **Articles** and **Pages** — carry an identical **SEO** panel at the bottom of their form. It is **collapsed by default**; click the heading to open it.

Every field is optional. Leave one blank and the site works out a sensible value from the content above it.

Field	What to Enter	Description
SEO title	Up to 60 characters	The blue clickable line in Google. Blank = the record's own title
Meta description	Up to 160 characters	The grey summary under it in Google. Blank = the summary/excerpt
Canonical URL	A full URL	Only when this content also lives at another address and you want Google to prefer that one
Robots	Index, follow (<i>default</i>) / Noindex, follow / Noindex, nofollow	Whether search engines may list this page
Social share image	Image, 1200×630 px recommended, up to 2 MB	The picture in WhatsApp/Facebook/LinkedIn previews. Blank = the sitewide default
Social share title	Up to 70 characters	Blank = falls back to the SEO title
X (Twitter) title	Up to 70 characters	Blank = falls back to the social share title
Social share description	Up to 200 characters	Blank = falls back to the meta description
X (Twitter) description	Up to 200 characters	Blank = falls back to the social share description
X (Twitter) image	Image up to 2 MB	Only when X should show a different picture
Page type (schema.org)	Pick one	Only visible to users who may edit structured data. Blank = the sitewide default
Schema template	Pick one	Only visible to users who may edit structured data. Applies a reusable JSON-LD blueprint
Custom JSON-LD structured data	A JSON object	Advanced escape hatch. Paste the JSON object only — no <code><script></code> tag. Must be valid JSON or saving is refused with <i>"The custom JSON-LD must be a valid JSON object or array."</i>

Note FAQ structured data is generated automatically from the FAQs tab. Do not paste it here as well.

7.2 Articles

FynnEdge Advisory (OPC) Pvt Ltd is a loan advisory and distribution business. We connect customers with suitable banks and NBFCs across personal loans, home loans, car loans, business loans, loans against property and credit cards.

How we work

Rather than applying to lenders one at a time, you share your profile once. We match it against participating lenders' published criteria and show you which ones you're likely eligible for, along with plain-language reasons — before you commit to a formal application.

Eligibility results shown on FynnEdge are indicative and subject to each lender's own verification, documentation and underwriting process.

FAQs

New faq

↑↓

Question	Status	Order
× No faqs Create a faq to get started.		

Field	Required?	What to Enter
Question	Yes	The question
Answer	Yes	The answer
Sort order	No	Number (default 0)
Status	Yes	Draft (<i>default</i>) / Published
Published at	Conditional	Only when Status is Published. Blank = publish immediately

Field	Required?	What to Enter
Expires at	No	Stops showing after this time

History tab: yes — with restore.

**Note about Preview on Pages** The **Preview** button only appears when the page's slug matches a real website address. A newly created page with a brand-new slug shows no Preview button until a developer wires that address up. This prevents dead preview links.

Screenshot 54 — General FAQs

List: Question (shortened to 60 characters), Status, Order, Published at, Expires at. Search: Question · Filter: Status · Reorder: drag rows · Row action: Edit · Bulk: Delete.

Form: Question (required) · Answer (required) · Sort order · Status · Published at (only when Published) · Expires at.

 **Note** This list shows **only** FAQs with no owner and no page placement. FAQs attached to a Page or Loan Product live on that record's FAQs tab, and FAQs pinned to whole pages live in **Page FAQs**. The three lists never overlap, so the same FAQ can never appear twice.

7.5 Page FAQs

Purpose. FAQs pinned to whole website pages — for example, showing the same three questions on every loan product page.

Open: Sidebar → **Content** → **Page FAQs**

The screenshot shows the 'Page FAQs' interface. On the left is a sidebar with a navigation menu. The main content area is titled 'Page FAQs' and includes a search bar, a 'New page FAQ' button, and a table with columns: Question, Shown on, Status, and Order. The table is currently empty, displaying a 'No page FAQs' message. The sidebar menu includes items like General FAQs, Grievance Redressal Matrix, How It Works Steps, Job Openings, Loan Landing Page Content, Loan Landing Page SEO, Loan Landing Pages, Loan Product Content, Loan Product SEO, Marketing Sections, Navigation Links, Page FAQs (highlighted), Pages, Schema Templates, Contact Enquiries, Access Control, Activity, Users, Marketing, and Newsletter.

Question	Shown on	Status	Order
No page FAQs			

Screenshot 27 — Page FAQs

List: Question, **Shown on** (a badge per placement), Status, Order, Expires at. Search: Question · Filters: Status, Page · Reorder: drag rows.

Form:

Field	Required?	What to Enter	Description
Question	Yes	The question	
Answer	Yes	The answer	Shown to visitors and published as FAQ structured data — write a direct, self-contained answer
Show on these pages	Yes	Pick one or more	Grouped and searchable. Every page is listed individually, and each group also offers an "Every ..." option covering all pages of that type at once
Sort order	No	Number (default 0)	Lower shows first. The same order applies on every page it appears on
Status	Yes	Draft (<i>default</i>) / Published	
Published at	Conditional	Only when Status is Published	Blank = publish immediately
Expires at	No		Stops showing after this time

Placement groups available: Main pages (Homepage, About, Careers, Contact, FAQs page, Check eligibility page) · Loan pages (Loans directory, Every loan product page, Every loan landing page) · Resources (Resources index, Every article page) · Calculators (directory, Every EMI calculator page, Every eligibility calculator page, Every prepayment calculator page, Fixed Deposit, SIP, Daily SIP, GST) · Legal & policy (Grievance redressal, Privacy policy, Terms & conditions, Disclaimer, Credit report terms).

7.6 Banners

Purpose. The sliding banner in the top-right of the homepage.

Open: Sidebar → **Content** → **Banners**

List: Image thumbnail, Heading, Status, Order, Published at, Expires at. Filter: Status · Reorder: drag rows.

Screenshot 28 — Banners list

Form:

Field	Required?	What to Enter	Description
Image	Yes	JPG/PNG/WebP up to 5 MB	Recommended 1440 × 1000 px (about 1.4:1). It fills the right-hand 60% of the homepage banner. The box is 1.2:1 on smaller laptops and 1.8:1 on tablets and the image is centre-cropped , so keep faces, logos and text in the middle and leave room at the edges
Image alt text	No	A short description	
Heading	Yes	The headline	
Subtitle	No	A supporting line	
Button label	No	e.g. <code>Explore loans</code>	

Field	Required?	What to Enter	Description
Button link	No	<code>https://... or /loans</code>	Must start with <code>http://</code> , <code>https://</code> or <code>/</code> , otherwise: <i>"The button link must start with <code>http://</code>, <code>https://</code> or <code>/</code>."</i>
Sort order	No	Number (default <code>0</code>)	Position in the rotation
Status	Yes	Draft (<i>default</i>) / Published	
Published at	Conditional	Only when Published	Blank = publish immediately
Expires at	No		Stops showing after this time

Delete: permanent — banners have no trash. **History tab:** yes, with restore.

Banners > Create

Create Banner

Image*

Drag & Drop your files or [Browse](#)

Recommended: 1440 × 1000px (roughly 1.4:1), JPG/PNG/WebP up to 5MB. It fills the right-hand 60% of the homepage banner — about 706 × 500px on a desktop, so 1440px wide keeps it sharp on high-DPI screens. The box is 1.2:1 on smaller laptops and 1.8:1 on tablets, and the image is centre-cropped to fit, so keep faces, logos and any text in the middle and leave room around the edges.

Image alt text

Heading*

Subtitle

Button label

Button link

A full URL, e.g. `https://fynnedge.com/loans`, or a site-relative path like `/loans`.

Sort order

Status*

Draft

Expires at

Optional. The banner stops appearing publicly after this time.

Screenshot 66 — Banner form

7.7 Marketing Sections

Purpose. Lets you rewrite specific call-to-action blocks on the website without a developer. Each block lives in a **fixed slot** and shows built-in default wording until you publish a section for that slot.

Open: Sidebar → **Content** → **Marketing Sections**

Screenshot 29 — Marketing Sections

The six available slots:

Placement	Where it appears on the website
Homepage — "Not sure which loan fits?" CTA	Homepage
Homepage — "Plan your EMI" CTA	Homepage
Homepage — closing "Ready to see what you're eligible for?" CTA	Bottom of the homepage
Homepage — Flexi Hybrid marquee strip (below header)	Scrolling strip under the header
Homepage — Quick Enquiry box	Homepage

Placement	Where it appears on the website
Loan pages — enquiry form (all loan and landing pages)	Every loan and landing page

Form:

Field	Required?	What to Enter	Description
Placement	Yes	Pick a slot	Changing this changes the hints on the fields below
Heading	Yes	The heading text	See the slot-specific guidance below
Subheading	No	A supporting line	
Description	No	A short paragraph	
Image	No	JPG/PNG/WebP up to 5 MB	
Image alt text	No	A short description	
Button label	No	e.g. <code>Submit Enquiry</code>	
Button link	No	<code>https://... or /eligibility</code>	Must start with <code>http://</code> , <code>https://</code> or <code>/</code>
Sort order	No	Number (default <code>0</code>)	
Status	Yes	Draft (<i>default</i>) / Published	Nothing changes on the site until this is Published
Published at	Conditional	Only when Published	Blank = publish immediately
Expires at	No		

Slot-specific guidance shown on the form:

If Placement is...	Then...
Flexi Hybrid marquee strip	Heading is the small badge label, e.g. <code>Our Specialty</code> . Description is the scrolling text

If Placement is...	Then...
Loan pages — enquiry form	Heading: write <code>:product</code> where the loan name should go, e.g. <code>Apply for a :product</code> — one row words every loan page. Subheading is the small label above the form, e.g. <code>Instant :product</code> . The rate and loan ceiling under it come from the loan product's own fields. Button label is the submit button
Homepage — Quick Enquiry box	Heading is above the box, e.g. <code>Get Started with a Quick Enquiry</code> . Button label is the submit button

Filters: Status, Trashed · **Reorder:** drag rows · **Bulk:** Delete, Force delete, Restore · **History:** yes, with restore.

7.8 Achievements

Purpose. The strip of numbers on the homepage ("550+ Cities served").

Open: Sidebar → **Content** → **Achievements**

Screenshot 47 — Achievements

List: Order, Metric name, **Shown as** (the finished figure, prefix + value + suffix), Status. Search: Metric name · Filter: Status · Reorder: drag rows.

Form:

Field	Required?	What to Enter	Description	Example
Metric name	Yes	Up to 60 characters	The caption under the number	Cities served
Value	Yes	Up to 20 characters	The figure itself	550
Prefix	No	Up to 10 characters	Goes before the value	₹
Suffix	No	Up to 10 characters	Goes after the value	+

Field	Required?	What to Enter	Description	Example
Display order	No	Number (default 0)	Lowest first. Publish as many as you like — the row spreads them evenly	1
Status	Yes	Draft (default) / Published		

 **Warning** — printed on the form *"Publish only figures the business has verified — this appears as a public claim."*

Delete: permanent (no trash). **History tab:** yes, with restore.

7.9 Contact Enquiries

A. PURPOSE

Every enquiry the public website's forms produce, in one list — the contact page form, the homepage Quick Enquiry box and the loan-page enquiry form. This is your lead inbox.

B. HOW TO OPEN IT

Sidebar → **Content** → **Contact Enquiries** (*at the bottom of the Content group*)

Screenshot 22 — Contact Enquiries list

C. THE LIST SCREEN

Column	What it shows
Name	The visitor's name, or <i>"Not provided"</i> — the Quick Enquiry box only asks for a phone number
Mobile	Their phone number, stored as a clean 10-digit number
Loan product	Which loan they enquired about, or — if it was a general enquiry
Lead source	Where the lead came from — currently always Website
Enquiry source	The specific form, e.g. Personal Loan Page , Homepage Quick Enquiry , Contact Page
Status	New (amber) · Contacted (blue) · Follow Up (dark blue) · Converted (green) · Rejected (red) · Closed (grey)
Created at	When it arrived

Column	What it shows
Type	Contact Form / Quick Enquiry / Loan Enquiry — optional column
Amount	The loan amount stated — optional column
Email	Optional column
Enquiries	How many times this person has enquired — optional column
Handled	Tick once a follow-up time is recorded — optional column

- **Search:** Name, Mobile, Enquiry source, Email
- **Filters:** Loan product (*only lists products that have actually produced an enquiry*), Lead source, **Status (multiple)**, Type, **Enquiry date (From / Until)**, Handled (Yes / No / All)
- **Sort:** Created at (newest first by default), Loan product, Status
- **Row action:** Edit
- **Bulk action:** Delete selected
- **Create: Not available** — enquiries only come from real visitors

 **About the "Enquiries" count** When the same phone number enquires again about the same product, the panel **bumps the count on the existing row instead of creating a second one** — so your list stays one row per person per product. A number above 1 means they have asked more than once, which usually means they should be called sooner. A general enquiry (the Quick Enquiry box, which names no product) is matched against **anything** already held for that number, because "call me back" is the same request whatever page they were on.

Screenshot 23 — Contact Enquiry detail

Section: Enquiry details — read-only. Customer name, Mobile, Email, Submitted on, Message.

Section: Source — read-only, "resolved on the server when the form was submitted — never taken from the browser". Loan product, Lead source, Enquiry source, Type, Landing page, Loan amount (formatted in Indian style, e.g. ₹5,00,000), Times enquired, Mobile verified.

Section: Follow-up — the only editable part:

Field	Required?	What to Enter	Description
Status	Yes	Pick one	Where this lead currently stands
Handled at	No	Date and time	Set this once the enquiry has been followed up

Automatic behaviour Saving with Status set to **Converted, Rejected or Closed** stamps **Handled at** with the current time automatically, if it was empty. A follow-up time you have already recorded is **never** erased.

E. WHY SO MUCH IS READ-ONLY

Everything the visitor submitted, and everything the server worked out about where they came from, is deliberately locked. An editable "Loan product" or "Enquiry source" would quietly rewrite the marketing numbers those columns exist to produce.

F. DELETE

Delete is on the Edit screen and in the bulk menu. It is **permanent** — enquiries have no trash.

G. STATUS WORKFLOW

Status	Meaning	Counts as
New	Just arrived, nobody has called yet	Open
Contacted	You have spoken to them once	Open
Follow Up	A call-back is arranged or needed	Open
Converted	They went ahead — this is the win	Settled
Rejected	Not proceeding	Settled
Closed	Closed for any other reason	Settled

You may move between any of these; the dropdown always offers all six.

 **What "reopening" means** If a person whose enquiry was already **settled** enquires again, the panel puts the row back to **New** and clears the **handled time** so it reappears in your open work. If their enquiry was still **open**, only the count goes up — the status is left alone.

7.10 Other Content sections (quick reference)

These follow the standard pattern from Section 5. Each is listed with its fields.

LIFE AT FYNNEDGE PHOTOS

Content → Life at FynnEdge Photos. The company photo gallery.

The screenshot shows a web application interface for managing photos. On the left is a sidebar with a navigation menu. The main content area is titled 'Photos' and displays a list of 6 photos. Each photo record includes a checkbox, a thumbnail, a caption, a status (all are 'Published'), and an order number. A 'New photo' button is located in the top right corner of the main area. The bottom of the list shows 'Showing 1 to 6 of 6 results' and a 'Per page' dropdown set to 10.

☐	Photo	Caption	Status	Order	
☐		Team Meeting	Published	0	Edit
☐		Office Space	Published	1	Edit
☐		Product Sprint	Published	2	Edit
☐		Team Outing	Published	3	Edit
☐		Weekly Standup	Published	4	Edit
☐		Coffee Break	Published	5	Edit

Screenshot 60 — Life at FynnEdge Photos

- **Adding photos:** the **New photo** form lets you select **up to 8 images at once**, and each becomes its own photo record. Fields: **Photos** (required, JPG/PNG/WebP up to 5 MB each, drag to reorder), **Caption** (applied to every photo in the batch — edit a photo afterwards to give it its own), **Starting order** (each photo after the first gets the next number), **Status**.
- **Editing one photo:** Photo (required), Image alt text, Caption, Sort order, Status.
- List: thumbnail, Caption, Status, Order. Filter: Status. Reorder: drag. Delete: permanent. History: yes, with restore.

HOW IT WORKS STEPS

Content → How It Works Steps. The numbered "how it works" strip.

Screenshot 55 — How It Works Steps

Field	Required?	What to Enter
Title	Yes	Up to 80 characters
Description	No	A sentence or two
Icon	No	A small square image up to 1 MB
Sort order	No	Number (default 0)
Status	Yes	Draft (default) / Published

Search: Title · Filter: Status · Reorder: drag · Delete: permanent.

JOB OPENINGS

Content → Job Openings. Roles listed on the Careers page.

Field	Required?	What to Enter
Title	Yes	The job title
Order	No	Number (default 0) — lower shows first on the Careers page
Status	Yes	Draft (<i>default</i>) / Published

Search: Title · Filter: Status · Reorder: drag · Delete: permanent.

These contacts are a regulatory disclosure. Keep names, phone numbers and turnaround times accurate and current.

NAVIGATION LINKS

Content → *Navigation Links*. The footer "Quick Links".

Field	Required?	What to Enter	Description
Label	Yes	Up to 60 characters	The wording visitors click
Internal route name	One of these two	e.g. <code>contact</code> , <code>loans.index</code> , <code>faqs.index</code>	The safer choice — the link disappears automatically if that page is ever renamed or removed, instead of becoming a broken link. Takes priority if both are filled in
External or internal URL	One of these two	<code>https://...</code> , <code>/careers</code> , <code>mailto:...</code> , <code>tel:...</code>	Must start with one of those. Never a route name
Opens in a new tab	No	On / Off	Switch on for links leaving the FynnEdge site
Location	Yes	Footer — Quick Links (<i>the only option</i>)	
Sort order	No	Number (default <code>0</code>)	
Is active	No	On (<i>default</i>) / Off	Off hides the link without deleting it

Search: Label · Filters: Location, Is active · Reorder: drag · Delete: permanent.

Screenshot 58 — Navigation Links

 **Note** You must set **exactly one** of *Internal route name* or *External or internal URL*. Leaving both blank is rejected.

Showing 1 to 4 of 4 results

Per page 10 ▾

Screenshot 59 — Calculator Pages

Field	Required?	What to Enter	Description
Calculator	Yes	Pick one. Each calculator may only have one entry	Which calculator page this text appears on
Title	No	A heading	Blank = the default heading "About this calculator"
Content	No	Rich text	Shown below the calculator, above the footer. Changes go live immediately

Note printed on the form Loan-category calculators (EMI, Eligibility, Prepayment) do **not** use this section. Their text comes from the **"EMI calculation explanation"** field on the relevant **Loan Product**.

SCHEMA TEMPLATES

Content → Schema Templates. Reusable structured-data blueprints for SEO specialists.

Screenshot 61 — Schema Templates

Field	Required?	What to Enter	Description
Name	Yes	Up to 120 characters, unique	How it appears in the Schema template picker on a page's SEO section
schema.org @type	Yes	Letters and digits only, up to 60	e.g. <code>HowTo</code> , <code>Event</code> , <code>Course</code> , <code>VideoObject</code> , <code>BreadcrumbList</code>
Active	No	On (default) / Off	Off stops it rendering everywhere it is attached, without detaching it
Notes	No	Up to 500 characters	What it is for and which pages should use it
JSON-LD body	Yes	A JSON object	No <code><script></code> tag. Placeholders in <code>{{ ... }}</code> are filled in per page; a placeholder with nothing to fill it removes its property rather than leaving it blank. <code>@id</code> is added

Field	Required?	What to Enter	Description
			automatically if omitted. Invalid JSON is rejected with <i>"The JSON-LD body must be a valid JSON object or array."</i>

List: Name, @type, **Pages using it**, Active, Updated at. Search: Name, @type · Filter: Active · Row action: Edit · Bulk: Delete.

 **Warning** Check **Pages using it** before deleting or deactivating — every one of those pages loses this structured data. **Prefer switching Active off to deleting.** A deleted schema template is technically recoverable, but this list has no Trashed filter, so you cannot find it again from inside the panel. See Section 5.2.

Screenshot 31 — Media Library

Column	What it shows
Preview	A thumbnail
File	Filename and full path
Disk / Type / Size	Where it is stored, its file type, how big it is
Modified	When it was last changed
Used by	Which record references it, or "Not referenced"
Status	Used · Unused · Missing (a record points at a file that is no longer there)
Actions	A Delete button on unused files only

Filters at the top: Search filename/path · Source · File type · Status. Paginated 25 per page.

Deleting an unused file. Click **Delete** on its row. Before deleting, the panel re-checks the file:

- Still unused → the file is deleted and *"Unused file deleted"* appears.

- Now referenced by something → nothing is deleted and a red *"This file is still referenced — it was not deleted"* appears.

 **Warning** Deleting a file here removes it from storage **permanently**. There is no undo and no trash. Only delete files clearly marked **Unused**.

7.11 The restricted "Content" and "SEO" doors

Four menu items look like duplicates of Loan Products and Loan Landing Pages, but they are not extra records — they are **narrower doors onto the same records**, so a marketing or SEO colleague can do their job without being able to touch commercial figures.

Menu item	Opens	Shows only
Loan Product Content	The same loan products	Publishing, Marketing and Content fields
Loan Product SEO	The same loan products	The SEO section
Loan Landing Page Content	The same landing pages	Publishing, Marketing and Content fields
Loan Landing Page SEO	The same landing pages	The SEO section

Loan Against Property	Loan Against Property	—	Published
Mudra Loan	Mudra Loan	—	Published
Personal Loan	Personal Loan	—	Published

Screenshot 45 — Loan Product Content (the restricted marketing view)

What these four have in common:

- The record's **name is shown but locked**, so you always know which product you are editing.
- There is **no Create button and no Delete button** — records are created and removed only through the full Loan Products / Loan Landing Pages sections.
- A **History** tab is present, but **without** "Restore this version".
- Access is controlled by its own separate permission. Being allowed into *Loan Product Content* gives you **no** access to the full *Loan Products* section, and vice versa.

 **Note** The restriction is enforced when the record is saved, not merely by hiding fields on screen. A commercial field cannot be changed through these pages by any means.

Loan Product Content — the fields you get:

- *Loan product*: Name (locked)
- *Publishing*: Status, Published at (only when Published), Expires at
- *Marketing*: Marketing headline, Summary, Benefits, Primary button label, Product image, Image alt text

- *Content:* Body, Features, Eligibility explanation, Documents explanation, Process steps

Not included — and therefore only editable by an administrator in the full **Loan Products** section: Name, Slug, Category, Calculator key, and every EMI-calculator field (amounts, tenures, rates).

8. Marketing — Newsletter Modules

8.1 Newsletter Dashboard

Purpose. The newsletter overview: list health, where subscribers come from, and which pages win subscribers.

Open: Sidebar → Marketing → Newsletter

Screenshot 32 — Newsletter Dashboard

Statistics cards:

Card	What the number means
Total subscribers	Everyone who has ever signed up, including those who left
Active	Confirmed and still subscribed — the only people campaigns reach
Pending confirmation	Signed up but have not clicked the confirmation link yet
Unsubscribed	Kept on record so they are never mailed again
New in last 30 days	Signups across every page on the site

Growth. Twelve weeks of signups as a simple bar table, one bucket per week, labelled by the week's start date. Use it to spot a trend, not exact daily figures.

Top pages. The ten pages that produced the most signups, grouped by exact URL, with the source and a count. This is how you find out that one article outperforms the homepage.

Recent campaigns. The last five campaigns that are sending or already sent, with how many recipients they had and how many opened.

 **Note** There is **no per-article conversion rate**, because the site does not track article views — a rate would need a denominator that does not exist. Signups per page are reported instead.

Filters / export: none. This page is read-only.

8.2 Subscribers

Purpose. Everyone who has signed up to the newsletter, with their consent record.

Open: Sidebar → **Marketing** → **Subscribers**

View

Resend confirmation

Unsubscrib

Screenshot 34 — Newsletter Subscribers

List: Email (copyable), Name, Status, Source, Page, Subscribed, Confirmed.

Search: Email, Name · Filters: **Status (multiple)**, **Source (multiple)**, **Subscribed from / until dates** · Sort: newest first by default.

Status meanings:

Status	Meaning	Will they receive campaigns?
Pending confirmation (amber)	Signed up, has not clicked the confirmation link	No
Active (green)	Confirmed and subscribed	Yes
Unsubscribed (grey)	Opted out	No
Bounced (red)	Email could not be delivered	No

Row actions:

Action	When it shows	What it does
View	Always	Opens the read-only detail
Resend confirmation	Only while status is <i>Pending confirmation</i>	Issues a fresh confirmation link and emails it. Any older link in their inbox stops working. Confirms with <i>"Confirmation email queued"</i>
Unsubscribe	Whenever they are not already unsubscribed	Marks them Unsubscribed and stamps the time. Asks to confirm first, warning: <i>"The record is kept — it is what stops this address being mailed again."</i>

The View screen (read-only):

- *Subscriber* — Email, Name, Status, **Topics** (shows *"All topics (no preferences set)"* when they never chose — that is what a one-field signup means, not "none")
- *Where they signed up* — Source, Page
- *Consent & history* — Subscribed, Confirmed, Unsubscribed, Consent recorded, Consent IP, First seen

Create / Edit / Delete: None of the three. Subscribers only exist through their own consented signup, their status is the outcome of *their* actions, and there is no delete button anywhere.

⚠ Why there is no Delete A subscriber row is both a **consent record** and an **unsubscribe record**. Deleting one is exactly how an address that opted out silently becomes mailable again. Use **Unsubscribe**, never deletion.

8.3 Campaigns

Purpose. Compose, preview, schedule and send newsletter emails.

Open: Sidebar → **Marketing** → **Campaigns**

Screenshot 33 — Newsletter Campaigns

List: Campaign, Subject, Status, Audience (shows **Everyone** when no segment), **Sent to** (recipient count), **Opened** (count and %), Scheduled, Sent.

Search: Campaign name, Subject · **Filter:** **Status (multiple)** · **Sort:** newest first.

 **About the Opened figure** Opens are measured with a tracking image, and many mail clients block images. **Treat the number as a minimum, never an exact count.** The panel says so in a tooltip on the column.

Create & create another

Cancel

Content

The branded header, footer and unsubscribe link are added automatically — write only the body here.

Featured blog article

Select an option

Selecting an article fills in the subject and body below from it. Everything stays editable afterwards — and nothing is ever sent automatically when an article is published.

Start from a template

Select an option

Email body*

B I U S x₂ x² H₂ H_a [List] [Table] [Link] [Image] [Code]

Button label

Read the article

Button link

Clicks on this button are tracked. Leave blank for no button.

Screenshot 35 — Composing a campaign

Section: Campaign

Field	Required?	What to Enter	Description
Campaign name	Yes	Up to 120 characters	Internal only — subscribers never see this
Subject line	Yes	Up to 150 characters	What appears in the inbox
Preview text	No	Up to 150 characters	The grey line beside the subject. Blank = mail clients use the first words of the email

Section: Content — *the branded header, footer and unsubscribe link are added automatically; write only the body.*

Field	Required?	What to Enter	Description
Featured blog article	No	Pick a published article	Selecting one fills in the subject, name, preview text and body from that article, and sets the button to "Read the full article" pointing at it. Everything stays editable afterwards
Start from a template	No	Pick an active template	Fills the body from the template — only if the body is still empty , so it never wipes work you have done
Email body	Yes	Rich text	The email itself
Button label	No	Up to 60 characters	e.g. <code>Read the article</code> . Leave blank for no button
Button link	No	A full URL	Clicks on this button are tracked

Section: Audience & schedule

Field	Required?	What to Enter	Description
Send to	No	A segment, or leave blank	Blank = everyone who is subscribed. Only confirmed, still-subscribed people are ever included, whichever segment you pick
Send at	No	Date and time, no earlier than now	Leave blank to send manually from the campaign list

Click **Create**. A new campaign is always saved as a **Draft**, attributed to you. Creating it never sends anything.

Note Publishing an article **never** sends an email automatically. Every send is a deliberate action taken here.

ROW ACTIONS

Action	When it shows	What it does
Preview	Always	Opens the finished email in a pop-up exactly as a subscriber would receive it. Close with Close
Edit	Only while Draft, Scheduled or Cancelled	Opens the form
Send / Send now	Only while Draft, Scheduled or Cancelled	See below
Cancel	Only while Scheduled or Sending	See below
Delete	Only while Draft	Permanently deletes the campaign

SENDING

Click **Send** (or **Send now** if it was scheduled). A confirmation box appears:

"Send this campaign?" — *"This queues an email to N subscriber(s). It cannot be undone once sending starts."*

The N shown is the live audience count at that moment. Confirm and:

1. The campaign becomes **Scheduled** and is handed to the background queue.
2. A green *"Campaign queued for sending"* appears, with *"Emails are sent by the queue worker. Progress appears in the Sent to column."*
3. The status moves to **Sending**, then **Sent**. Refresh the list to watch the **Sent to** count climb.

Warning A send cannot be undone. Always use **Preview** first, and send a test to a segment of one before mailing the whole list.

CANCELLING

Cancel is offered while a campaign is Scheduled or Sending. It confirms with:

"Emails already handed to the queue may still go out; this stops everything that has not been queued yet."

So cancelling mid-send stops the remainder — it cannot recall what has already left.

STATUS WORKFLOW

Status	Colour	Editable?	Deletable?
Draft	Grey	Yes	Yes
Scheduled	Blue	Yes	No
Sending	Amber	No	No
Sent	Green	No	No
Cancelled	Red	Yes	No

Why Sent campaigns cannot be edited A campaign that is sending or already sent is a historical record of what people actually received. Editing it would make your archive disagree with their inbox. If you open the edit screen for one anyway, you are simply returned to the list.

8.4 Templates

Purpose. Reusable email bodies to start new campaigns from.

Open: Sidebar → **Marketing** → **Templates**

Screenshot 62 — Newsletter Templates

Field	Required?	What to Enter	Description
Name	Yes	Up to 120 characters	
Available when composing	No	On (default) / Off	Off retires a template without breaking campaigns that already used it
Description	No	Up to 200 characters	What this template is for, shown to whoever composes a campaign
Body	Yes	Rich text	The body only — the branded header, footer and unsubscribe link come from the email layout

List: Name, Description, Available, Updated. Search: Name · Filter: Available · Row actions: Edit, Delete · Bulk: Delete. Deletion is permanent.

8.5 Segments

Purpose. Saved audience filters, so you can send to part of your list.

Open: Sidebar → **Marketing** → **Segments**

Screenshot 63 — Newsletter Segments

Section: Segment

Field	Required?	What to Enter
Name	Yes	Up to 120 characters, e.g. <code>Blog subscribers</code>
Available when composing	No	On <i>(default)</i> / Off
Description	No	Up to 200 characters

Section: Who this includes — *leave everything blank to include every subscribed person. Filters combine: a subscriber must match **all** of them.*

Field	Options	Description
Signed up from	Homepage, Blog article, Blog listing, Footer, Website — pick several	Blank = anywhere
Interested in	Personal finance, Credit & CIBIL, Loans — pick several	Blank = any topic. Includes people who never changed their preferences — they are opted into everything by default
Subscribed on or after	A date	
Subscribed on or before	A date	

Section: Size. A live line reading *"N subscriber(s) match this segment right now. The audience is re-evaluated at send time, so this number moves as people join and leave."*

Note There is deliberately **no subscriber-status filter here**. Every send is restricted to confirmed, still-subscribed people whatever segment you choose — offering "status" would wrongly imply a segment could mail an unsubscribed address.

List: Segment, Description, **Subscribers** (live count), Available. Row actions: Edit, Delete. Deletion is permanent.

8.6 Newsletter Settings

Purpose. How newsletter emails identify themselves, and whether confirmation is required.

Open: Sidebar → **Marketing** → **Newsletter Settings**

Newsletter Settings

Save

Newsletter

☒ **Newsletter enabled**
Off removes every signup form from the website and stops the public subscribe endpoint. Existing subscribers and campaigns are untouched.

☒ **Require email confirmation (double opt-in)**
Strongly recommended. New subscribers stay pending until they click a confirmation link, which is what proves consent and protects your sending reputation.

☒ **Send a welcome email**
Sent once, after a subscriber confirms.

Sender identity

How newsletter emails appear in the inbox. Leave blank to use the application's configured mail sender. Mail server credentials are not set here — they live in the environment configuration.

From name

From address

Must be an address your mail provider is allowed to send from, or messages will fail SPF/DKIM checks.

Reply-to address

Where replies go. Defaults to the contact email from Settings.

Screenshot 64 — Newsletter Settings

 **Access** This page is **administrator-only** by default. Sender identity and double opt-in decide the deliverability of every email your domain sends, which is an administrator decision rather than a campaign one — so it is deliberately excluded from the Marketing role.

Section: Newsletter

Field	What to Enter	Description
Newsletter enabled	On / Off	The master switch for the whole newsletter
Require email confirmation (double opt-in)	On / Off	On = a new signup must click a confirmation link before they become Active
Send a welcome email	On / Off	Whether a welcome email goes out on confirmation

Section: Sender identity — *"Leave blank to use the application's configured mail sender. Mail server credentials are not set here — they live in the environment configuration."*

Field	What to Enter	Example
From name	The name in the inbox	FynnEdge
From address	The sending email address	newsletter@fynnedge.com
Reply-to address	Where replies go	support@fynnedge.com

Click **Save** at the top. A green *"Newsletter settings saved"* appears.

 **Warning** Switching **double opt-in off** means new signups become Active without confirming. That raises the risk of invalid addresses and spam complaints, which harms deliverability for everyone on the domain. Change it only with a clear reason.

9. Website Settings

9.1 Settings

Purpose. The site's identity: branding, homepage headline, contact details, business profile, social links, and the colours and fonts of the public website.

 Users

Square PNG or ICO, up to 512KB. Leave blank to keep the default icon.

FynnEdge connects you with suitable banks and NBFCs for personal loans, home loans, car loans, business loans and loans against property — with clear, upfront eligibility before you apply.

Loan approval is subject to lender policies, documentation and underwriting. Eligibility results shown on this site are indicative, not a guarantee of approval.

Shown when a link to the site is shared on social media or messaging apps and the page itself has no image set. Recommended 1200×630px, up to 2MB.

Paste a Google Maps link for your location — [Share](#) → [Copy link](#), or [Share](#) → [Embed a map](#). Either works.

Encode the citywide Organization schema that Casale and AI assistants read to identify the business. Leave any field blank and it is simply omitted — never success.

Screenshot 36 — Settings

This is a single long form with a **Save** button at the top. It saves everything at once.

Section: Branding — the name, logo and favicon shown across the site header, footer and browser tab.

Field	Required?	What to Enter
Website name	Yes	Up to 60 characters
Tagline	Yes	Up to 80 characters. Shown under the logo in the header and footer
Logo	No	PNG, SVG or WebP up to 2 MB. Blank keeps the default FynnEdge mark
Favicon	No	Square PNG or ICO up to 512 KB. Blank keeps the default icon

Section: Homepage hero — the main headline visitors see at the top of the homepage.

Eyebrow text (up to 80 characters) · Headline · Headline (highlighted part) · Subheading.

Section: Footer & legal

Registered company name · Footer disclaimer.

**Warning — compliance** The footer disclaimer is a regulatory statement about eligibility results not guaranteeing approval. Do not shorten or remove it without approval.

Section: SEO defaults — *used when a specific page has no SEO image of its own.*

Default social share image.

Section: Contact channels — *used across the public site instead of hard-coded numbers and addresses, including the footer.*

Phone · Email · WhatsApp · Address · Map location URL.

Section: Business profile (structured data) — *feeds the sitewide Organization schema that Google and AI assistants read to identify the business. Leave any field blank and it is simply omitted — never guessed.*

Business description · Street address · City / locality · State / region · PIN code · Country code (default `IN`) · Areas served · Loan amount range.

Section: Founder message — *shown in the founder section of the About page.*

Founder name · Founder photo.

Section: Social media — *full links including `https://` , shown as icon links in the footer. Leave any blank to hide that icon.*

Instagram · Facebook · WhatsApp · LinkedIn · X (Twitter).

Sections: Appearance — four groups controlling the public site's look. **Leave any field blank to keep the default theme.**

Group	Applies to	Fields
Appearance — Header	The site header	Background colour, Font colour, Link & accent colour, Font, Font size, Font weight, Font style
Appearance — Footer	The site footer	The same seven
Appearance — Main content	The homepage and every page's main area (not header or footer)	The same seven
Appearance — Homepage banner	The sliding banner top-right of the homepage	Text colour, Font, Heading font size, Heading font weight, Font style, Button colour, Button hover colour, Button text colour

Note about the banner Its text is **white by default** because it sits over a photograph. Leave a field blank to keep that. The button matches the site's other buttons unless you change it here.

Click **Save**. A green "*Settings saved*" appears and changes are live on the public site immediately.

Warning Colour choices affect the whole public website. Always open the site in another tab and check readability — especially the contrast between background and font colours — before you finish for the day.

9.2 SEO & Tracking

Purpose. Sitewide search-engine defaults, verification tags, analytics and advertising tags, crawler policy, and the cookie-consent banner.

Open: Sidebar → **Website Settings** → **SEO & Tracking**

Screenshot 37 — SEO & Tracking

The page is organised into tabs, with a single **Save** button at the top that saves them all.

TAB 1 — SEO

Search engine indexing: **Allow search engine indexing** (on / off).

⚠ Warning Switching this **off removes the entire public website from Google and Bing**. It exists for a pre-launch site. Never switch it off on a live site.

Default meta tags — used on any page that has not set its own; a page's own SEO section always wins.

Default page title · Canonical base URL · Default meta description.

Social sharing defaults — Open Graph and X previews.
Default share title · X (Twitter) card type · Default share description · Default X (Twitter) image.

TAB 2 — VERIFICATION

Site ownership verification. Each field renders a single meta tag, and only when filled in. **Paste either the token or the whole tag the service gives you.** Includes Google, Bing and others, plus **Other verification tags** for anything else.

TAB 3 — ANALYTICS & TRACKING

Google — injected into every public page automatically once enabled. **Never paste these snippets into the Advanced tab as well.**

Field	What to Enter
Google Analytics enabled	On / Off
GA4 Measurement ID	e.g. G-XXXXXXXXXX
Google Tag Manager enabled	On / Off
GTM Container ID	e.g. GTM-XXXXXXX
Google Ads conversion ID	Your conversion ID

Other platforms — leave a field blank to load nothing for that platform. Each tag is built from its ID; there are no snippets to paste.
Microsoft Clarity project ID · Meta (Facebook) Pixel ID · LinkedIn Insight partner ID.

TAB 4 — AI & CRAWLERS

AI and answer engines. **Allow AI and answer-engine crawlers** (on / off).

 **Note** This is controlled **separately from Google and Bing** — a site can rank normally in search while opting out of AI training and answer synthesis. Turning it off never affects normal search crawling.

Extra robots.txt directives. Appended to the generated robots.txt. The admin panel, login, the application funnel, storage internals and signed previews are **already** disallowed — this is for anything else.

TAB 5 — PRIVACY & CONSENT

Cookie consent banner: Show the cookie consent banner · Require consent for analytics · Require consent for marketing.

 **How consent is enforced** When the banner is on, the categories marked as requiring consent are **not rendered into the page at all** until the visitor accepts. The scripts are blocked on the server, not merely hidden after loading.

Policy links — shown in the banner; leave one blank to hide that link: Cookie policy URL · Privacy policy URL · Terms URL.

TAB 6 — ADVANCED

 **This tab is only visible to super administrators.**

Custom tracking scripts. Raw HTML for tags with no dedicated field above — other verification tags, niche pixels, A/B testing tools. **Rendered exactly as written, so a broken tag here breaks every page on the site.** Gated by marketing consent when that is switched on.

Custom CSS & JavaScript. Injected **without** `<style>` / `<script>` wrappers of your own — write the CSS or JavaScript body only.

Click **Save**. A green "SEO & tracking settings saved" appears.

9.3 Structured Data

Purpose. Controls how the website describes itself to Google and AI assistants in JSON-LD.

Open: Sidebar → **Website Settings** → **Structured Data**

Structured Data

Redirects

Structured Data (JSON-LD)

Save

Organization node

The business itself, referenced by every other node in the graph as #organization. Its address, phone, description and areas served are edited under Settings → Business profile — this section controls how it is typed.

Types

Organization
FinancialService

One schema.org type per line, e.g. Organization, FinancialService, LocalBusiness. "Organization" is always kept — the rest of the graph identifies the business by it.

Extra properties (JSON)

Any further schema.org properties for the Organization node, e.g. {"foundingDate": "2023-04-01", "numberOfEmployees": 12}. These override the generated values on a name clash.

WebSite node

The site as a work, referenced as #website by every page.

Type

WebSite

Usually WebSite.

Extra properties (JSON)

Any further schema.org properties for the WebSite node, e.g. a {"potentialAction": {...}} sitelinks search box.

WebPage node

The page being viewed. A single page can override its type on its own SEO section; this is the default every page starts from.

Default page type*

WebPage — a general page

Content language

en

BCP 47 language tag used as inLanguage on the WebSite and WebPage nodes, e.g. en or en-IN.

Extra properties (JSON)

Any further schema.org properties added to every page's WebPage node. Use sparingly — a value that is not true of every page belongs on that page's own SEO section instead.

Screenshot 38 — Structured Data

 **Access** Restricted by its own permission and, by default, granted to **super administrators only** — not to the Marketing or SEO roles. An administrator can grant it under **Roles**.

Section	What it controls
Organization node	The business itself, referenced by every other node as <code>#organization</code> . Its Types and Type settings decide how it is classified. <i>Its address, phone, description and areas served are edited under Settings → Business profile, not here</i>
WebSite node	The site as a work, referenced as <code>#website</code> by every page
WebPage node	The page being viewed: Default page type and Content language . Any single page can override its type in its own SEO section — this is the default every page starts from
Extra properties (JSON)	An advanced escape hatch for additional properties

Click **Save**. A green "*Structured data settings saved*" appears.

9.4 Redirects

Purpose. Sends visitors and search engines from an old website address to a new one. Use it whenever you change a slug, so existing links and Google rankings do not break.

Open: Sidebar → **Website Settings** → **Redirects**

Screenshot 39 — Redirections

List: Old path (copyable), Goes to, Type, Active, **Times used**, **Last used** (or *Never*).

Search: Old path, Goes to · Filters: Active, Type · Sort: Old path (default), Times used, Last used · Row actions: Edit, Delete · Bulk: Delete.

Form:

Field	Required?	What to Enter	Description
Old path	Yes	Path only, starting with <code>/</code> , up to 255 characters	e.g. <code>/old-loan-page</code> . Trailing slashes and query strings are ignored when matching
New URL or path	Yes	<code>/loans/personal-loan</code> or a full <code>https://...</code> URL	Where visitors should end up
Type	Yes	301 — Permanent (<i>default</i>) or 302 — Temporary	301 passes SEO ranking to the new URL; 302 keeps ranking on the old one
Active	No	On (<i>default</i>) / Off	Off keeps the row without redirecting

💡 **The query string is carried across automatically.** A visitor arriving at `/old-page?utm_source=email` lands on `/new-page?utm_source=email`.

Validation messages you may see:

Message	What it means
"A redirect for that path already exists."	Another row already covers this path. <code>/a</code> , <code>a/</code> and <code>/A</code> all count as the same path
"Enter a path starting with / or a complete URL including https://."	The destination is malformed
"The destination is the same as the old path — that would redirect to itself."	The two fields match
"That destination redirects back here, which would create a redirect loop."	Your destination is the source of another active redirect that eventually leads back — the browser would bounce until it gave up

Delete: permanent. Prefer switching **Active** off, so you keep the record and the usage history.

10. Access Control

10.1 Activity

Purpose. A single, searchable feed of every change any administrator has made anywhere in the panel. It reads the same history that each record's own **History** tab shows — this is that data across all records at once.

Open: Sidebar → **Access Control** → **Activity**

« Previous Next » Showing 1 to 25 of 249 results				

1 2 3 4 5 6 7 8 9 10

Filters at the top:

Filter	Options
Admin	<i>All admins</i> , or any one user
Action	<i>All actions</i> , Created, Updated, Deleted
Entity	<i>All entities</i> , or any record type that actually appears in the log
Date from / Date to	A date range

Your filter choices are kept in the web address, so you can bookmark or share a particular view.

What each row shows: the action (green *created*, grey *updated*, red *deleted*), which record it was (by its name/title, or its reference with (*deleted*) if the record is gone), who did it (or **System** for an automatic change), exactly which fields changed from what to what, and the date and time. 25 rows per page.

What you cannot do: nothing here is editable or deletable. That is the point — the log is the audit trail.

Note Sensitive fields are **never written to the log in the first place** — personal data, KYC details, credit and financial detail, passwords and tokens are stripped before a row is saved, not merely hidden from view.

10.2 Users

Purpose. The admin accounts that can sign in, and the roles each one has.

Create User

Name*

Email address*

Password*

☒ Can log into the admin panel

Only answers whether this account can log in at all — the roles below decide which modules they can actually see and use.

Roles

Select an option

E.g. Marketing, SEO. A role determines exactly which modules this user gets access to — manage roles under Access Control → Roles.

Screenshot 42 — Creating a user

Field	Required?	What to Enter	Description
Name	Yes	Their full name	
Email address	Yes	A valid, unique email	Their sign-in username
Password	Yes on create	A strong password	On Edit this becomes optional — <i>"Leave blank to keep the current password."</i> Use the eye icon to reveal what you typed
Can log into the admin panel	No	On (<i>default</i>) / Off	Only answers whether this account can sign in at all — the roles below decide what they can actually see and use
Roles	No	Pick one or more	Which modules this person gets. Manage the roles themselves under Roles

 **Warning — two separate switches** A user with **Can log into the admin panel** on but **no role** can sign in and will see an almost empty panel. That is not a fault — it is an account waiting for a role. Always assign a role when you create someone. Conversely, switching **Can log into the admin panel** off locks the account out immediately, whatever roles it has. That is the correct way to suspend someone who has left.

Edit. Any field above. Leave **Password** blank to keep the existing one.

Delete. A **Delete** button at the top of the Edit screen, and a bulk delete on the list. It is **permanent — there is no trash for users**.

 **Warning** Do not delete an account simply because someone has left. Switch **Can log into the admin panel** off instead — deleting removes the person's name from every future view of the activity log.

10.3 Roles

Purpose. A role is a named bundle of permissions. You give a role to a user, and they can do exactly what the role allows — nothing more.

Screenshot 49 — Editing the Marketing role

Give the role a **Name**, then tick the permissions it should have. Permissions are grouped into tabs — **Resources**, **Pages** and **Widgets** — and within Resources, one block per module with tick boxes for each action:

Permission	Lets the user...
View Any	See the module in the sidebar and open its list
View	Open a single record
Create	Add new records
Update	Change existing records
Delete / Delete Any	Remove one, or several at once
Restore / Restore Any	Bring back a trashed record
Force Delete / Force Delete Any	Destroy a trashed record permanently
Replicate	Duplicate a record
Reorder	Drag rows into a new order

There is a select-all control per module and per tab.

 **The minimum that makes a module usable** **View Any** alone shows the module and its list. Without **Update** the user can look but not change. Without **Create** there is no New button. Grant the smallest set that lets the person do their job.

 **Warning** Editing a role changes what **every** user holding it can do, instantly. Check the Users list first to see who that is.

A note for administrators When a developer adds a brand-new module to the panel, its permissions do not exist until a one-off command is run. If a module you expect is missing from this screen, ask your developer to generate its permissions.

11. User Roles & Permissions

11.1 How access works — two independent layers

```
Layer 1 – Can log into the admin panel?    (the switch on the user's account)
      | no → sign-in refused, whatever roles they hold
      | yes
      ▼
Layer 2 – Which roles does this user hold? (assigned on the user's account)
      |
      ▼
      Only the modules those roles allow appear in the sidebar
```

Layer 1 only answers "may this account sign in at all". It does **not** mean full access.

Layer 2 decides everything else.

11.2 The roles that exist in this system

There are exactly **three** roles configured:

Role	Permissions held	Intended for
super_admin	All of them (279)	Administrators / owners
Marketing	61	The marketing and content team
SEO	12	The SEO specialist

 **Note Marketing and SEO** are a **working starting point, not a fixed structure**. You can rename them, change what they include, or create entirely new roles under **Filament Shield** → **Roles**. Roles such as "Caller", "Team Leader", "Manager", "Cluster" or "Account Team" **do not exist in this system** unless you create them yourself.

11.3 super_admin

Can access: Everything. Every module, every page, every action — the sidebar shown in Section 4.1 in full.

Can create / edit / view / delete: Everything the panel allows anyone to do, including the actions no other role has by default:

- Lenders, Lender Offers, Loan Products, Eligibility Rules, Journeys, Document Types and Document Requirements
- Loan Applications, Applications, Customers, Credit Score Checks
- Users, Roles and the Activity log
- Settings, SEO & Tracking, Structured Data, Redirects, Newsletter Settings, Media Library
- The **Advanced** tab of SEO & Tracking (custom scripts / CSS / JavaScript) — **visible to super administrators only**

Cannot access: nothing.

 **How it works technically** super_admin is not a long tick-list — it is a bypass. Anyone holding it skips every permission check. Give it out sparingly.

11.4 Marketing

Can access — full create, edit and delete:

Articles · Banners · Testimonials · Life at FynnEdge Photos · Job Openings · General FAQs · Marketing Sections · Navigation Links · How It Works Steps · Calculator Pages · Achievements · Newsletter Campaigns · Newsletter Templates · Newsletter Segments

Can access — view and edit only (no create, no delete):

Loan Product Content · Loan Landing Page Content

Can access — view only:

Newsletter Subscribers · the Newsletter Dashboard

Cannot access at all:

Loan Products and Loan Landing Pages (the *full* editors) · Lenders · Lender Offers · Eligibility Rules · Journeys ·

Applications · Loan Applications · Customers · Credit Score Checks · Document Types · Document Requirements · Employers · Pages · Page FAQs · Redirects · Users · Roles · Activity · Settings · SEO & Tracking · Structured Data · Schema Templates · Media Library · Newsletter Settings · Funnel Analytics · Eligibility Tester

Two deliberate exclusions worth knowing:

Excluded	Why
Deleting a newsletter subscriber	A subscriber row is both a consent record and an unsubscribe record. Deleting one is how an address that opted out silently becomes mailable again. Marketing gets read access only
Newsletter Settings	Sender identity and double opt-in decide the deliverability of every email your domain sends — an administrator decision, not a campaign one

Role-specific workflow. Marketing edits loan-product marketing copy through **Loan Product Content**, never through the full Loan Products editor. That restricted door hides — and refuses to save — the name, slug, category and every EMI-calculator figure.

11.5 SEO

Can access — view and edit only (no create, no delete):

Articles · Pages · Loan Product SEO · Loan Landing Page SEO

Cannot access anything else — including Loan Products and Loan Landing Pages in full (which also carry calculator, financial and routing fields), Redirects, Structured Data, Schema Templates, SEO & Tracking, Users, Roles, and the whole Catalog group.

Role-specific workflow. SEO edits the SEO panel on a loan product or landing page through **Loan Product SEO / Loan Landing Page SEO** — the same records, with only the SEO section exposed.

 **Two structured-data fields the SEO role does not see** On the shared SEO panel, **Page type (schema.org)** and **Schema template** are hidden unless the user also has the Structured Data permission — which by default only super administrators hold. Every other SEO field (title, description, canonical, robots, social images and titles, and Custom JSON-LD) is fully available to the SEO role.

 **Redirects are not in the SEO role by default** Even though redirects are ordinarily SEO work, they are not granted here. If your SEO specialist needs them, an administrator can add the Redirect permissions to the SEO role under **Roles**.

11.6 Permissions granted to nobody by default

Some permissions exist but are held only by super_admin until an administrator deliberately assigns them:

Permission	Why it is held back
Structured Data page and Schema Templates	They shape the JSON-LD every public page emits, including the types in the graph. Which role gets that is an administrator's decision, not a default
Media Library	It can permanently delete files from storage
Activity log	It is the audit trail

11.7 Role comparison at a glance

Module	super_admin	Marketing	SEO
Loan Products (full)	Full	—	—
Loan Product Content	Full	View + Edit	—
Loan Product SEO	Full	—	View + Edit

"Full" = view, create, edit and delete as that module allows. "—" = the menu item does not appear at all.

12. Complete Business Workflow

This is the end-to-end path a real customer takes, using only stages that exist in this system. Stages the **website performs automatically** are marked ⚙; stages **your team performs in the admin panel** are marked 👤.

SETUP (done once, then maintained)

👤 Lender added	Catalog → Lenders
↓	
👤 Employer categories defined	Lenders → (lender) → Employer categories
↓	
👤 Loan product created	Catalog → Loan Products
↓	
👤 Lender Offer created	Catalog → Lender Offers (amounts, tenure, rate, fee)
↓	
👤 Eligibility rules written	Catalog → Eligibility Rules (Draft)
↓	
👤 Rules tested	Catalog → Eligibility Tester
↓	
👤 Rules published	Publish → becomes Active, the old version is Archived
↓	
👤 Journey form built	Catalog → Journeys (steps and questions)
↓	
👤 Documents required listed	Catalog → Document Requirements

A CUSTOMER COMES ALONG

⚙️ Visitor lands on the website	
↓	
⚙️ Visitor starts the journey (status: In progress)	→ a record appears in Catalog → Applications and in Catalog → Customers
↓	
⚙️ Visitor answers each step	→ every answer is stored on the Responses tab
↓	
⚙️ Journey completed	(status: Completed)
↓	
⚙️ Eligibility evaluated	Every active lender for that product is scored Each lender: Eligible / Not eligible, with a FOIR figure and pass/fail reasons
↓	
⚙️ Visitor picks a lender	→ a LOAN APPLICATION is created (status: Lender selected)
↓	
⚙️ Required documents listed	From Document Requirements for that lender offer

(status: Documents pending)

⚙ Visitor uploads documents

(status: Documents submitted)

Documents verified or rejected

Loan Applications → (record) → Documents tab
→ Verify, or Reject with a reason

⚙ Visitor submits

(status: Submitted)

Only possible once EVERY required document is uploaded
in the required quantity – otherwise they are told
"Please upload every required document before submit"

WITH THE LENDER (recorded by hand for now)

Under review

Loan Applications → Edit → Status

Sanctioned

The lender has approved it

Agreement pending

Waiting for the customer to sign

Disbursal processing

The lender is releasing funds

Disbursed

Money has reached the customer

At any point: Rejected · Withdrawn · Cancelled

12.1 The separate enquiry path

Not every visitor completes a journey. Many just ask to be called back:

12.2 A quick credit-score check

12.3 Stages this system does not have

To be explicit, so nobody looks for them: there is **no** underwriting workspace, **no** sanction-letter generation, **no** disbursement processing, **no** loan account ledger, and **no** commission, payout, incentive, cashback, subvention or docking calculation anywhere in this admin panel. The later application statuses are a record of what the lender did, entered by hand — not a process this system runs.

12.4 What the system calculates automatically

Calculation	Where you see it	In plain language
FOIR	Eligibility Tester, and behind every eligibility result	The share of the applicant's income that would go to loan repayments. The panel works out the EMI for the requested amount using that lender's own starting rate and tenure , adds any existing EMIs, and divides by total monthly income. Different for each lender, by design
Eligibility	Behind every application journey; visible in the Eligibility Tester	Every Mandatory rule is checked. Fail one and the applicant is Not eligible with that lender. Preferred and Warning rules never block
EMI	The public calculators	Worked out from the amount, rate and tenure set on the Loan Product
Employer category	Used inside eligibility rules	The applicant's employer name is matched against the Employers list, and that lender's grade for it is used
Handled at	Contact Enquiries	Stamped automatically when you set a status of Converted, Rejected or Closed
Open rate	Campaigns	Opened ÷ successfully sent, as a percentage. A minimum , since many mail clients block the tracking image

13. Reports

This panel has **three** reporting screens. All are read-only, none has a download or export button.

13.1 Funnel Analytics

Purpose	Where visitors drop out of the loan application process
----------------	---

How to open	Catalog → Funnel Analytics
Filters	Loan product (all, or one) · Range (7 / 30 / 90 days, or All time)
How to generate	Change a filter — the numbers refresh immediately. There is no Run button
How to read it	Six funnel stages with counts and conversion %. Every % is against "Journeys started" , not the row above. Then a per-product table, and — only when one product is selected — a per-step breakdown showing the exact question people abandon on
Export	None

Full detail: Section 6.1.

13.2 Newsletter Dashboard

Purpose	Newsletter list health and growth
How to open	Marketing → Newsletter
Filters	None — the periods are fixed (all-time totals, last 30 days, and 12 weeks of growth)
How to read it	Five statistic cards, a 12-week growth table, the top 10 signup pages, and the last five sent campaigns with open counts
Export	None

Full detail: Section 8.1.

13.3 Admin Activity

Purpose	The audit trail — who changed what, and when
How to open	Access Control → Activity

Filters	Admin · Action (Created / Updated / Deleted) · Entity · Date from / Date to
How to generate	Set the filters; results refresh immediately. Your filters are kept in the web address, so a view can be bookmarked or shared
How to read it	One row per change, with the before and after value of every field that changed
Export	None

Full detail: Section 10.1.

13.4 Getting numbers out of the list screens

There is **no CSV or Excel export anywhere in this panel** — not on Contact Enquiries, not on Subscribers, not on Applications. To work with a list outside the panel:

1. Open the list screen.
2. Apply the filters you want.
3. Set **Per page** to **All**.
4. Show any hidden columns you need with the column icon.
5. Select the table in your browser, copy, and paste into a spreadsheet.

Note If a proper export is important to your team, ask your developer — Contact Enquiries and Subscribers are the usual candidates.

14. Import / Export

14.1 Import: Lender Offers

Where: Catalog → **Lender Offers** → the **Import** button at the top-right.

What it does: creates or updates lender offers in bulk from a CSV file. **One row = one lender × one loan product.**

How to import

1. Go to **Catalog** → **Lender Offers**.
2. Click **Import**.
3. **Download the example CSV** offered in the dialog — it has the correct column headings.
4. Fill it in and save as CSV.
5. Upload it in the dialog.
6. **Map your columns:** the panel lists each expected column beside a dropdown of the headings found in your file. Matching names are matched for you; correct any that are wrong.
7. Click **Import**. It runs in the background — you can carry on working.
8. A notification tells you how many rows imported and how many failed.
9. If any row failed, a **failed-rows CSV** is offered for download, with the reason on each row. Fix those rows and import that file again.

Columns

Column	Required?	Format	Notes
<code>lender_name</code>	Yes	Text, up to 255	Matched to an existing lender by name. Created only if genuinely new
<code>lender_type</code>	No	<code>bank</code> or <code>nbfcc</code>	Only used when creating a brand-new lender
<code>loan_product_slug</code>	Yes	Text, up to 255	Must already exist. Matched strictly by slug
<code>status</code>	No	<code>active</code> or <code>inactive</code>	
<code>min_amount</code> , <code>max_amount</code>	No	Number	
<code>min_tenure_months</code> , <code>max_tenure_months</code>	No	Whole number	
<code>interest_rate_from</code> , <code>interest_rate_to</code>	No	Number	

Column	Required?	Format	Notes
processing_fee_flat_amount_min , processing_fee_flat_amount_max	No	Number	
processing_fee_percent_min , processing_fee_percent_max	No	Number	
processing_fee_gst_extra	No	yes/no, true/false, 1/0	
processing_fee_note	No	Text, up to 255	
min_age , max_age	No	Whole number	
min_credit_score	No	Whole number	
min_monthly_income	No	Number	
min_employment_vintage_months	No	Whole number	
employment_types	No	Pipe-separated , e.g. salaried\ self-employed	Unrecognised values are silently dropped

Example row

```
lender_name,lender_type,loan_product_slug,status,min_amount,max_amount,interest_rate_from,em
HDFC Bank,bank,personal-loan,active,50000,4000000,10.50,salaried|self-employed
```

What happens after the import

- **Existing offer** (same lender + same product) → **updated in place**. It is never duplicated.
- **No such offer** → created.
- **Lender not found** → created, using `lender_name` and `lender_type`.
- **Loan product not found** → **that row fails**, with "No loan product found with slug 'X'."

⚠ Warning An existing lender's name, type, logo and branding are never overwritten by an import — those stay under your control in the Lenders section. Only the offer figures are updated. Because a matching offer is **updated in place**, a mistake in your CSV silently overwrites live commercial terms. Import a two-row test file first and check the result.

14.2 Bulk upload: Employers

Where: Catalog → **Employers** → the **Bulk upload employers** button.

What it does: sets how each lender grades each employer, in bulk. **One row = one employer × one lender.**

Columns — all three are required

Column	Format	Notes
employer_name	Text, up to 255	Matched by name; created if genuinely new
lender_name	Text, up to 255	Must already exist
category_key	Text, up to 50	Must be one of that lender's own category keys

Example

```
employer_name,lender_name,category_key
Tata Consultancy Services,HDFC Bank,A
Infosys,HDFC Bank,A
Local Traders Pvt Ltd,HDFC Bank,C
```

What happens after the upload

Each row sets that employer's category for that lender. An existing rating is updated; a new one is created.

Rows fail with a clear reason when:

Message	Fix
"No lender found named 'X'."	Create the lender first under Catalog → Lenders, or correct the spelling
"No 'X' employer category is configured for [Lender]. Set it up under Lenders → [Lender] → Employer Categories first."	Add that category to that lender first

Why categories are not auto-created Categories are curated per lender and are used directly in eligibility rules. Silently creating one from a CSV typo would corrupt that lender's grading scale and change who qualifies.

14.3 Export

There is no export function anywhere in this admin panel. No CSV, Excel or PDF download exists on any list screen, report or record. See Section 13.4 for the copy-and-paste workaround.

15. Notifications, Confirmations & Error Messages

15.1 Where messages appear

Green (success) and red (failure) messages appear briefly in the **top-right corner**. Confirmation dialogs appear in the centre of the screen and must be answered before anything happens.

15.2 Success messages

Message	After
Saved	Saving any record
Created	Creating any record
Deleted	Deleting a record
Rule set published	Publishing an eligibility rule set
Campaign queued for sending — <i>"Emails are sent by the queue worker. Progress appears in the Sent to column."</i>	Sending a campaign
Campaign cancelled	Cancelling a campaign
Confirmation email queued	Resending a subscriber confirmation
Subscriber unsubscribed	Unsubscribing someone
Settings saved	Saving Settings
SEO & tracking settings saved	Saving SEO & Tracking

Message	After
Structured data settings saved	Saving Structured Data
Newsletter settings saved	Saving Newsletter Settings
Unused file deleted	Deleting a file from the Media Library
Restored to the version from [date and time]	Restoring a version from a History tab
Your lender offer import has completed and N rows imported. <i>(plus "N rows failed to import" if any did)</i>	A lender-offer import finishing
Your employer rating import has completed and N rows imported. <i>(plus failures if any)</i>	An employer upload finishing

15.3 Failure messages

Message	What it means	What to do
Could not publish <i>(with a list of reasons)</i>	The rule set failed its pre-publish checks	Fix each reason listed — see Section 6.8
This file is still referenced — it was not deleted	Something started using the file between you loading the page and clicking Delete	Reload the Media Library and check the Used by column
The original record no longer exists	You tried to restore a version of a record that has since been deleted	Nothing to do — the record is gone
Could not restore — a previous value now conflicts with another record (e.g. a reused slug)	The old value clashes with something created since	Free up the conflicting value, or make the change by hand instead

15.4 Confirmation dialogs

Where	What it says
Publish an eligibility rule set	<i>"This makes it the active rule set for this lender product and archives whichever version was active before."</i>
Send a campaign	<i>"Send this campaign? This queues an email to N subscriber(s). It cannot be undone once sending starts."</i>
Cancel a campaign	<i>"Emails already handed to the queue may still go out; this stops everything that has not been queued yet."</i>
Unsubscribe a subscriber	<i>"The record is kept — it is what stops this address being mailed again."</i>
Restore this version	<i>"This sets every field below back to its previous value and saves — creating a new History entry for the restore itself."</i>
Resend confirmation	A plain confirmation
Any Delete	A plain "are you sure"

15.5 Validation messages on forms

Invalid fields turn red with the reason underneath, and nothing is saved. Beyond the standard "this field is required", these are the custom ones:

Message	Where
<i>"This lender already has an offer for this loan product."</i>	Lender Offers
<i>"The button link must start with http://, https:// or /."</i>	Banners, Marketing Sections
<i>"The link must start with http://, https://, /, mailto: or tel:."</i>	Navigation Links
<i>"A redirect for that path already exists."</i>	Redirects
<i>"Enter a path starting with / or a complete URL including https://."</i>	Redirects
<i>"The destination is the same as the old path — that would redirect to itself."</i>	Redirects

Message	Where
<i>"That destination redirects back here, which would create a redirect loop."</i>	Redirects
<i>"The custom JSON-LD must be a valid JSON object or array."</i>	The SEO section on any record
<i>"The JSON-LD body must be a valid JSON object or array."</i>	Schema Templates
<i>"This rule set has no rules yet — add at least one before publishing."</i>	Publishing eligibility rules
<i>"Rule 'X' has no conditions — remove it or add at least one."</i>	Publishing eligibility rules
<i>"At least one mandatory rule is required, otherwise every applicant would be eligible by default."</i>	Publishing eligibility rules
<i>"The effective-from date must be before the effective-until date."</i>	Publishing eligibility rules
<i>"Please upload every required document before submitting."</i>	Shown to the customer on the website, not in the panel

15.6 What the panel does not do

There are **no email alerts**, **no in-panel notification bell** and **no scheduled reports**. Nobody is emailed when a new enquiry or application arrives. Work the **Contact Enquiries** and **Loan Applications** lists as inboxes, sorted by newest first.

16. Common Problems / Troubleshooting

Q: I cannot sign in. It says my details do not match.

Check for typos and Caps Lock. Use **Forgot your password?** to reset. If it still fails, an administrator may have switched off *"Can log into the admin panel"* on your account — ask them to check.

Q: I can sign in but the sidebar is almost empty.

Your account has no role, or a role with very few permissions. Ask an administrator to assign the right role under **Access Control → Users**.

Q: A menu item described in this guide is missing.

Your role does not include it. That is by design. See Section 11 for what each role sees.

Q: I published something but it is not on the website.

Work through this list:

1. Is **Status** set to **Published** (not Draft)?
2. Is **Published at** in the past? A future date schedules it for later.
3. Is **Expires at** blank or in the future? A past date has already hidden it.
4. For a loan product or landing page, is the **parent** published too?
5. Refresh the public page with Ctrl+F5 (Cmd+Shift+R on a Mac).

Q: The EMI calculator is not showing on a loan product page.

The calculator only appears when the **whole** EMI calculator section is filled in. Any single blank field among the amount, tenure and rate values hides it. Open **Loan Products** → **(product)** → **EMI calculator** and complete every field.

Q: I changed "Who typically qualifies" on a lender offer, but eligibility results did not change.

That is expected. Those fields are **display only** — they are shown to visitors as bullet points. Real matching is done by **Catalog** → **Eligibility Rules**. Change the rules, then republish.

Q: A lender shows as "Not eligible" for everybody in the Eligibility Tester, with no reasons.

That lender has no **Active** rule set. Go to **Catalog** → **Eligibility Rules**, find or create one for that lender offer, add at least one Mandatory rule with a condition, and **Publish**.

Q: Publish is refused on my rule set.

Read the red box — it lists exactly what is wrong. The usual cause is a rule with no conditions, or no rule set to Mandatory priority. See Section 6.8.

Q: There is no Publish button on a journey.

Journeys have no Publish action — set **Status** by hand on the Edit screen. Remember to set the previous version to **Archived** first, so two versions are not Active at once.

Q: I cannot find a Create button on Applications / Loan Applications / Customers / Contact Enquiries / Credit Score Checks / Subscribers.

There is none, by design. Those records only ever come from a real person using the public website.

Q: The same person appears once but has enquired several times.

Correct. A repeat enquiry from the same number about the same product **bumps the count** on the existing row instead of adding a new one. Switch on the **Enquiries** column to see the count.

Q: I deleted something by mistake.

If it was a Lender, Loan Product, Loan Landing Page, Article, Page, Testimonial or Marketing Section, open that list, set the **Trashed** filter to *Only trashed*, find it, and click **Restore**. **Everything else — Schema Templates**

included — cannot be recovered from inside the panel; restore it from a backup, or recreate it. See Section 5.2.

Q: I saved a wrong value over a good one.

Open the record's **History** tab. If it is a content record (Article, FAQ, Testimonial, Banner, Photo, Marketing Section, Achievement) each *updated* row has a **Restore this version** button. On other records, History shows you the old value so you can retype it.

Q: The customer cannot submit their application.

Every required document must be uploaded, in the required quantity. Open the application's **Documents** tab and compare it with **Catalog → Document Requirements** for that lender offer. A requirement with "Minimum uploads" of 3 needs three files, not one.

Q: I rejected a document by mistake.

Click **Verify** on the same document — it clears the rejection and marks it verified.

Q: A campaign says Sending but the count is not moving.

Emails are sent by a background worker. Refresh the page after a minute. If it never moves, ask your developer to check that the queue worker is running.

Q: The open rate looks far too low.

Opens are counted by a tracking image and most mail clients block images. Treat the figure as a **minimum**. Button clicks, when you set a button link, are a more reliable signal.

Q: I cannot edit a campaign.

Campaigns that are **Sending** or **Sent** cannot be edited — they are a record of what people actually received. Duplicate the content into a new campaign instead.

Q: A subscriber is stuck on "Pending confirmation".

They have not clicked their confirmation link. Use **Resend confirmation** on their row, and ask them to check their spam folder.

Q: Where do I export this list to Excel?

There is no export anywhere in the panel. Set **Per page** to **All**, then select, copy and paste into a spreadsheet. See Section 13.4.

Q: My import failed on some rows.

Download the failed-rows CSV offered after the import. Each row carries its own reason. Fix those rows and import that file on its own.

Q: I cannot delete a file in the Media Library.

The **Delete** button only appears on files marked **Unused**. If it refused with "*This file is still referenced*", something began using it between the page loading and your click — reload and check **Used by**.

Q: A colour change made text unreadable on the website.

Open **Website Settings** → **Settings**, find the relevant Appearance section, and **clear** the field to fall back to the default theme. Blank always means "use the default".

Q: My changes were lost when I came back to the form.

The panel does not save automatically. Always click **Save changes** (or **Save**). A very long idle period can also end your session — sign in again and redo the edit.

Q: The page looks broken or a button does nothing.

Refresh with Ctrl+F5 (Cmd+Shift+R). If it persists after a recent website update, ask your developer — a front-end rebuild may be needed.

17. Best Practices

17.1 Before you change anything live

1. **Draft first.** Every content section starts as **Draft** for a reason. Write it, read it back, then publish.
2. **Use Preview.** On Loan Products, Articles and Pages the **Preview** button shows you the real public page — drafts included — through a private 30-minute link.
3. **Test eligibility rules before publishing.** The **Eligibility Tester** exists precisely so a rule change never goes live untested.
4. **Import a two-row test file first.** A matching row is *updated in place*, so a bad CSV silently overwrites live commercial terms.

17.2 Prefer switching off to deleting

Instead of deleting...	Do this
A lender	Set Status = Inactive
A lender offer	Set Status = Inactive
A page, article or product	Set Status = Draft , or set Expires at
A redirect	Switch Active off

Instead of deleting...	Do this
A navigation link	Switch Is active off
A newsletter template or segment	Switch Available when composing off
A schema template	Switch Active off
A subscriber	Use Unsubscribe — never delete
A colleague who has left	Switch Can log into the admin panel off

Most sections delete **permanently**. Only Lenders, Loan Products, Loan Landing Pages, Articles, Pages, Testimonials and Marketing Sections have a trash you can actually recover from inside the panel.

17.3 Keeping your data clean

- **Never change a Key or a Slug once it is in use.** Document type keys, journey field keys and slugs are referenced elsewhere — eligibility rules test field keys, and slugs are live web addresses. If a slug must change, add a **Redirect** from the old path the same day.
- **Write the "why" down.** Use the **Notes** field on eligibility rule sets, e.g. `FOIR relaxed from 50% to 55% per bank circular dated 01-09-2026`. Six months later that note is what tells you whether the rule is still current.
- **Version, do not overwrite.** Create a new rule set or journey version rather than editing the live one. Publishing the new one archives the old automatically, so you always have a way back.
- **Fill in alt text on every image.** It is what screen readers and search engines use.
- **Check "Used by" and "Pages using it"** before deleting a document type, schema template or media file.

17.4 Publishing content well

- Keep **SEO title** under 60 characters and **Meta description** under 160 — that is where search engines cut them off.
- Leave SEO fields blank when the automatic value is fine. Blank means "work it out from the content", which stays right as the content changes.
- Set a **social share image** of 1200 × 630 px on anything you expect to be shared.
- For **Banners**, keep faces, logos and text in the middle — the image is centre-cropped and the crop shape changes with screen size.
- Only publish **Achievements** figures the business has verified. They are public claims.

- Keep the **Grievance Redressal Matrix** and the **footer disclaimer** accurate — both are regulatory disclosures.

17.5 Handling personal data

- **Credit Score Checks, Customers and Contact Enquiries hold personal data** — PAN, date of birth, credit scores, phone numbers. Open them only for a genuine business reason and never share what you see.
- **Never delete a newsletter subscriber.** The row is the consent and unsubscribe record.
- Journey sessions carry a **Credit bureau consent** section. That is your consent evidence — do not delete the customer record that holds it.

17.6 Account security

- Give **super_admin** to as few people as possible. It bypasses every check.
- Give every other colleague the smallest role that lets them work. Start from **Marketing** or **SEO** and add only what is missing.
- Turn on **two-factor authentication** on your own account via **Profile**, and store the recovery codes somewhere safe.
- Never share an account. The **Activity** log is only useful when each change carries a real person's name.
- Review **Access Control** → **Users** quarterly and switch off anyone who has left.

17.7 Working the leads

- Sort **Contact Enquiries** by *Created at* (newest first — the default) and work down.
- Use the **Handled = No** filter to see everything still outstanding.
- Switch on the **Enquiries** column: anything above 1 is someone who has asked more than once and should be called first.
- Always set a status. **Converted / Rejected / Closed** stamps the handled time for you and takes the row out of your open work.

17.8 Newsletter discipline

- **Preview every campaign** before sending — the pop-up shows the finished email exactly as a subscriber receives it.
- Send to a **segment of one** (yourself) as a live test before mailing the whole list.
- Double-check the **Send to** audience. Blank means *everyone*.
- Keep **double opt-in** on. It protects the deliverability of every email your domain sends.

- Remember a send **cannot be undone**.

17.9 A safe weekly routine

1. **Contact Enquiries** — filter *Handled = No* and clear the backlog.
2. **Loan Applications** — check anything sitting in *Submitted* or *Under review* and update it from what the lender has told you.
3. **Documents** — verify or reject anything still marked *Uploaded*.
4. **Funnel Analytics** — look at last 7 days against last 30 for any sudden drop.
5. **Activity** — skim the week's changes.
6. **Media Library** — check for **Missing** files, which mean a record is pointing at a file that is gone.

18. Logging Out

1. Click your **avatar** in the top-right corner.
2. Click **Sign out**.

You can also use the **Sign out** button on the Welcome card of the Dashboard.

You are returned to the sign-in screen and your session on this browser ends.

Note Signing out here does not sign you out of other browsers or devices. On a shared or public computer, always sign out and close the browser window.

Appendix A — Status Reference

Every status used anywhere in the panel, in one place.

A.1 Publishing status — content records

Used by: Loan Products, Loan Landing Pages, Articles, Pages, all FAQs, Banners, Testimonials, Marketing Sections, Achievements, Life at FynnEdge Photos, How It Works Steps, Job Openings, Grievance levels.

Status	Colour	Meaning
Draft	Amber / grey	Not visible on the public website
Published	Green	Visible — subject to Published at and Expires at where those exist

Sections that also have **Published at** and **Expires at**: Loan Products, Loan Landing Pages, Articles, Pages, FAQs, Page FAQs, Banners, Testimonials, Marketing Sections.

Sections with a simple on/off only: Achievements, Photos, How It Works Steps, Job Openings, Grievance levels.

A.2 Enquiry status — Contact Enquiries

Status	Colour	Meaning	Open or settled
New	Amber	Just arrived	Open
Contacted	Blue	You have spoken to them	Open
Follow Up	Dark blue	A call-back is arranged or needed	Open
Converted	Green	They went ahead	Settled
Rejected	Red	Not proceeding	Settled
Closed	Grey	Closed for another reason	Settled

Setting any **settled** status stamps **Handled at** automatically if it was blank.

A.3 Enquiry type — Contact Enquiries

Type	Which form it came from
Contact Form	The full contact page form
Quick Enquiry	The homepage Quick Enquiry box (phone number only)

Type	Which form it came from
Loan Enquiry	An enquiry form on a loan or landing page

A.4 Application status — Loan Applications

Status	Colour	Set by	Meaning
Draft	Grey	Website	Just begun
Lender selected	Grey	Website	The customer chose a lender
Documents pending	Grey	Website	Waiting for uploads
Documents submitted	Amber	Website	Everything required has been uploaded
Submitted	Amber	Website	The customer submitted it
Under review	Amber	You	The lender is assessing it
Sanctioned	Green	You	The lender approved it
Agreement pending	Green	You	Waiting for the customer to sign
Disbursal processing	Green	You	The lender is releasing funds
Disbursed	Green	You	✔ Money has reached the customer
Rejected	Red	You	The lender declined
Withdrawn	Red	You	The customer withdrew
Cancelled	Red	You	Cancelled for another reason

A.5 Document status — the Documents tab

Status	Colour	Meaning
Uploaded	Amber	Waiting for your check
Verified	Green	You accepted it

Status	Colour	Meaning
Rejected	Red	You rejected it, with a reason. The customer must re-upload

A.6 Journey session status — Applications

Status	Colour	Meaning
In progress	Amber	Started but not finished
Completed	Green	Every step done
Abandoned	Grey	Left unfinished

A.7 Journey definition status — Journeys

Status	Colour	Meaning
Draft	Amber	Being built. Not used by visitors
Active	Green	The live form. Only one per product should be Active
Archived	Grey	Superseded

A.8 Eligibility rule set status — Eligibility Rules

Status	Colour	Meaning
Draft	Amber	Being built. Not used to evaluate anyone
Active	Green	Live. Only one per lender offer at a time. Set only by the Publish button
Archived	Grey	Superseded automatically when a newer version is published

A.9 Rule priority — within a rule set

Priority	Colour	Effect on eligibility
Mandatory	Red	Fails the lender if not met
Preferred	Green	Affects ranking only — never fails
Warning	Amber	Surfaces a caveat — never fails

A.10 Eligibility outcome

Status	Meaning
Eligible	Every Mandatory rule passed
Not eligible	At least one Mandatory rule failed — or that lender has no Active rule set
Conditional	Eligible with caveats

A.11 Lender / Lender Offer status

Status	Colour	Meaning
Active	Green	Live: used in eligibility matching and shown publicly
Inactive	Grey	Paused: excluded from matching and hidden publicly, but the record and its rules are kept

A.12 Credit check status — Credit Score Checks

Status	Colour	Meaning
Not requested	Grey	No check was asked for
Pending	Amber	Waiting on the bureau
Completed	Green	A score came back
Failed	Red	The bureau could not complete it

A.13 Subscriber status — Newsletter Subscribers

Status	Colour	Receives campaigns?
Pending confirmation	Amber	No
Active	Green	Yes
Unsubscribed	Grey	No
Bounced	Red	No

A.14 Campaign status — Campaigns

Status	Colour	Editable?	Deletable?
Draft	Grey	Yes	Yes
Scheduled	Blue	Yes	No
Sending	Amber	No	No
Sent	Green	No	No
Cancelled	Red	Yes	No

A.15 Recipient status — inside a campaign

Status	Colour	Meaning
Queued	Grey	Waiting to be sent
Sent	Green	Delivered to the mail server
Failed	Red	Sending failed
Skipped	Amber	Not sent — the person was no longer eligible to receive it

A.16 Media file status — Media Library

Status	Meaning
Used	At least one record references this file
Unused	Nothing references it — safe to delete
Missing	A record points at a file that is no longer in storage

Appendix B — Screenshot Index

All screenshots were captured from this application running locally, signed in as an administrator, at 1600 px wide.

#	File	Screen
1	01-login.png	Sign-in screen
2	02-dashboard.png	Dashboard
3	03-applications-list.png	Loan Applications list
4	04-loan-application-edit.png	Loan Application detail (status, Documents, History)

66	66-banner-create.png	Banner form
67	67-testimonial-create.png	Testimonial form

Appendix C — Coverage & Verification Notes

C.1 Sections documented

All 40 modules and all 9 standalone pages in the panel are covered.

Catalog (15): Funnel Analytics · Eligibility Tester · Loan Applications · Credit Score Checks · Customers · Document Requirements · Document Types · Eligibility Rules · Employers · Journeys · Applications · Lender Offers · Lenders · Loan Products · Testimonials

Content (21): Media Library · Achievements · Articles · Banners · Calculator Pages · Life at FynnEdge Photos · General FAQs · Grievance Redressal Matrix · How It Works Steps · Job Openings · Loan Landing Page Content · Loan Landing Page SEO · Loan Landing Pages · Loan Product Content · Loan Product SEO · Marketing Sections · Navigation Links · Page FAQs · Pages · Schema Templates · Contact Enquiries

Access Control (3): Activity · Users · Roles

Marketing (6): Newsletter Dashboard · Subscribers · Campaigns · Templates · Segments · Newsletter Settings

Website Settings (4): SEO & Tracking · Settings · Structured Data · Redirects

Also covered: Dashboard · Sign-in, password reset and two-factor · Profile · Sign-out · the shared SEO panel · the shared History / version-restore tab · both bulk imports.

C.2 How this document was verified

- Every statement was taken from the application's own configuration and confirmed against the running system:
- **Field lists, labels, help text, defaults, required flags and validation messages** were read directly from each form definition.
 - **Columns, searchable fields, filters, sort orders, row actions and bulk actions** were read from each table definition.
 - **Statuses, colours and their meanings** were read from the status definitions in the code.
 - **Role permissions** were confirmed by querying the live database: `super_admin` holds 279 permissions, `Marketing` 61, `SEO` 12.
 - **Which resources the global search covers** was confirmed by querying the panel at runtime — seven resources, listed in Section 4.2.
 - **Which sections have a trash** and **which support scheduled publishing** were confirmed by inspecting the live database structure, not assumed from the forms. This turned up two asymmetries that are documented in Section 5.2: **Schema Templates** soft-delete but offer no Trashed filter to find a deleted one again, and **Marketing Sections** can be restored from the list but not from the record's own edit screen.
 - **The sidebar structure and ordering** were read from an actual screenshot of the running panel.
 - **All 67 screenshots** were captured from the live application signed in as an administrator.

C.3 Deliberately not documented, because it does not exist

The following were checked for and are **absent** from this admin panel. They are listed so nobody searches for them:

Not present	Note
Dashboard statistics, charts or date filters	The Dashboard has only the Welcome and Filament cards. Reporting is on its own pages
Any CSV / Excel / PDF export	Import exists (two importers); export does not

Not present	Note
Email alerts or an in-panel notification bell	Messages appear only while you are using the panel
Scheduled or emailed reports	
Commission, payout, incentive, cashback, subvention or docking calculations	No such feature exists
An underwriting workspace, sanction-letter generation, disbursement processing or a loan ledger	The later application statuses are recorded by hand
Roles named Caller, Team Leader, Manager, Cluster, IT or Account Team	Only <code>super_admin</code> , <code>Marketing</code> and <code>SEO</code> exist. Others can be created under Roles
Enforced two-factor authentication	It is available and optional, not required for anyone
A "Loan Applications" Create button	Applications only come from real customers

C.4 Points needing confirmation from your team

These are correct as the software stands, but depend on decisions or infrastructure outside the panel:

1. **Public web address.** This guide uses `https://fynnedge.com/admin` . Confirm the live address with whoever hosts the site.
2. **Roles in practice.** `Marketing` and `SEO` are seeded as a working example. Confirm they match how your team is actually organised, and adjust under **Roles** if not.
3. **Newsletter sending depends on a background worker.** Campaigns move from *Sending* to *Sent* only while that worker is running on the server. Confirm with your developer that it is running in production.
4. **The credit bureau connection.** How Credit Score Checks behave in production depends on which bureau provider is configured on the server.
5. **The later loan-application statuses are manual.** The form itself says these are a stopgap "until a FYNN-ON sync exists". Agree internally who updates them and how often.
6. **Journeys have no Publish button.** Agree a house rule: archive the old version *before* activating the new one.
7. **Deletion is permanent in most sections.** Confirm that database backups are being taken, and how far back they go.

C.5 Screenshots worth adding later

Every screen is captured. These would benefit from being retaken on the **production** system with real data, since the local system used here has limited sample data:

- Loan Applications list and detail (currently few records)
- Funnel Analytics (currently low volumes)
- The Documents tab on a Loan Application with real uploaded documents — **no screenshot of the Verify / Reject dialogs exists**, as no application in the local data has documents attached
- Credit Score Checks (currently empty)
- A sent campaign showing real recipient and open counts
- The **Import** dialog and its column-mapping step for both importers — these open as pop-up dialogs and were not captured

End of document.
